## YouTestMe & LMS Integration: Easy Configuration

Training and development are essential processes in all companies. The need for LMS, the software for eLearning course management, is already widely recognized.

Trained employees mean better performance, which leads to *higher profits*.

However, how could those companies measure the effectiveness of their online training programs?

The answer is – through an **online examination platform**, the one that can be **seamlessly integrated** with **your LMS**.

With YouTestMe GetCertified, no migration is required, while the integration is seamless:

1. **Synchronize user data** from your LMS to YouTestMe GetCertified
2. Candidates can **start the test directly from your LMS** and be navigated to the test-taking screen of YouTestMe GetCertified
3. Test results are automatically **returned to the LMS**

Moreover, you can customize the branding and interface of YouTestMe GetCertified to fit LMS standards so the candidates will not notice the transition between the systems.
