Division Organization through Roles & Permissions

Manage large organizations and their complex structures with ease!

YouTestMe GetCertified allows you to delegate user management and test administering to various branches of your organization.

If there is a single test conducted by various departments, sectors, or divisions, your managers can work independently on the same tests without having knowledge of each other.

Division admins can monitor the progress of their candidates and manage the examination process. However, they are not able to access nor see candidates from other divisions and their test attempts.

On the other hand, **super admins** are able to generate useful statistics to compare the branches in total or over time and can oversee the entire process.
