## Self-Managed e-Testing Center

Whether your test measures professional competence, IT proficiency, or driving skills, YouTestMe can help you achieve your goal of a **fair, valid, reliable, and secure** exam.

A global computer-based testing solution provider, the YouTestMe team organizes **flexible assessments** and proposes a convenient and **easy-to-access service** for both test center owners and students.

We build a **personalized, integrated platform, an end-to-end solution** for exam development, delivery, registration, scheduling, results processing, and reporting.

An unlimited number of testing sessions may be organized for a single test, each adapted to the specific environment.

To easily choose how you wish to engage our services, we offer consulting to develop the **best testing program** together. It is up to you to decide whether the test and training design, content creation, and candidate organization be handled by you or the YouTestMe Premium Support team.

Once everything is set up, the testing process is managed by a **self-organized (SO) system**. Test-takers can choose and pay the preferred program without any coordination or management of you, the test owner.

## How?

Candidates can **sign up for the specific testing session** depending on whether they prefer to:

- Provide us with test materials and a list of candidates
- Choose a date and time for your test
- Select your preferred proctoring, grading & reporting settings

Regardless of how or where the exam is delivered, the **test results** are **streamlined** into one candidate or session record, for your convenience. Furthermore, once the test is over, the candidate and the test owners are informed of the results and delivered reports by email immediately.
