

YouTestMe Monthly

March 2021

Job Scheduler

Automate, schedule & scale workloads

Need to reduce your operating costs? YouTestMe GetCertified now allows you to **automate your workload** and **schedule the execution of jobs** to run at specified times.

A job may be concretely identified with a single process. You can schedule and automate data import, export, any communication between **YouTestMe GetCertified** and external systems or processes within the YouTestMe platform. For example:

- Schedule a daily import of new users from your LMS
- Automate archiving test results older than one year
- Schedule an automated deletion of accounts inactive more than 90 days

You can always preview job execution history and logs and set up in-application or email notifications for job activity.

API Integrations

Bring YouTestMe to your environment

With our API, you can easily **integrate other systems** and **applications** with YouTestMe GetCertified.

You can programmatically access a wide range of functionalities, features, and data from YouTestMe.
