Multilingual Examination

Test management, reporting, and navigation in YouTestMe GetCertified have just turned more practical and way less time-consuming, especially suitable for international organizations conducting certifications and tests in more than one language!

Multilingual Interface

The interface can be translated on demand and delivered in more than **100 languages**, while special characters of all alphabets are fully supported!

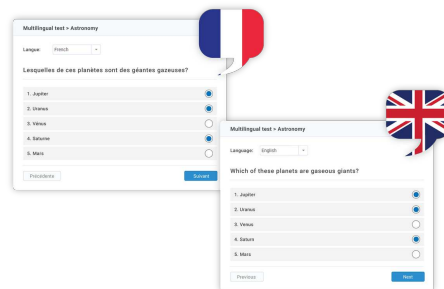

Your **candidates worldwide** can now navigate through the application in their preferred language, independently from each other.

Multilingual Tests

In addition to the multilingual interface, YouTestMe GetCertified also features **multilingual question content**.

It means no more separate tests for each language.

Administrators can **create different language versions** for each question and allow candidates to take the test in the preferred version, e.g., in a native language. And the best part is - **all data is centralized** in a single report, independently of the language in which the test is taken!
