YouTestMe

Classroom2020

College Edition

Product Brochure

This document has the introductory information about Classroom2020 College Edition.

Introduction

YouTestMe Classroom2020 – College Edition is Learning Management System (LMS) and knowledge evaluation software adjusted to college education system.

It features creating college study programs, academic calendars, organizing users in user groups, creating courses with multimedia lessons, automated test and answer generators, organizing questions in question pools, customizable security roles and sequential testing suitable for progressive learning.

Technology

YouTestMe Classroom2020 – College is a web-based application, coded in Java programming language connected to an Oracle database. It can be accessed through any web browser (Microsoft Internet Explorer/Edge, Chrome, Firefox, Safari, Opera, etc.). However, this does not mean that data is accessible via the internet – it is possible to restrict access to a closed network for greater security and privacy of information and data.

Benefits for Colleges

Effective administration of courses and classes by:
- Generating tests by using the preselected criteria and various, fully customizable questions,
- Attaching multimedia content to lessons,
- Automatic grading and reporting,
- Creating courses and programs suited for the college system,
- Keeping a simple and clear personal knowledge database, containing everything related to the respective user.

Benefits for Students

- Test their knowledge before the actual exam using software-generated practice tests,
- Receive results in real time,
- Familiarity with the college course taking system,
- Significantly better interaction with the subject through self-assessment and practicing,
- An easily-navigated personal knowledge collection, containing everything related to the respective user.
