1 What is YouTestMe?

YouTestMe represents a web-based enterprise application software (EAS) line of products for knowledge evaluation and computer-based learning. There are three distinct products based on YouTestMe platform:

1. **YouTestMe GetCertified**
   Online exam software for knowledge, evaluation, certification, and it is suitable for standard educational institutions, companies, and governments.
2. **YouTestMe Classroom2020**
   Learning Management system (LMS) and Knowledge Testing system (KTS) exclusively designed for colleges and universities.
3. **YouTestMe Mobile**
   A mobile application for taking quizzes created in GetCertified or Classroom2020

1.1 YouTestMe GetCertified

YouTestMe GetCertified is a web-based enterprise application software for businesses and governments distributed as a virtual machine that can be installed on a client's premises or a cloud server, thus giving the client full control over the application and data. It features automated test generators, answers generator, organizing questions into question pools (banks), users into groups, and customizable security roles. It also has a graphics certificate designer, automated issuing of a certificate, reporting system, and modules for conducting training and surveys.

1.2 YouTestMe Classroom2020

YouTestMe Classroom2020 is a Learning Management System (LMS) and Knowledge Testing system (KTS) exclusively designed for colleges and universities.
It features creating college study programs, academic calendars, organizing users in user groups, creating courses with multimedia lessons, automated test, and answer generators, organizing questions in question pools, customizable security roles, and sequential testing suitable for progressive learning.

2 What are the benefits of using YouTestMe software?

1. Replaces slow, tedious, labor-intensive paper-based process
2. Automated test creation, distribution, and evaluation
3. Instant feedback such as current progress, pass-fail status, various statistics, etc.
4. Collects and archives valuable data for future analysis
5. Automatic issuing of Certificates
6. Automated notification of third parties and archiving of data
7. Opens new possibilities such as different tests per student, testing on the distance, using multimedia for training and testing, etc.

3 Who are the potential customers?

Since customization is one of the benefits YouTestMe provides, it can be applied in many fields and industries, for example:

1. **Corporate sector**
   a. Certification for compliance
   b. Professional certification
   c. Employee training
2. **Government/Military/Public Sector**
   a. Government employee training and certification
   b. Certification or licensing of citizens
   c. Suitable for frequent training, knowledge verification and certification typical required by military
3. **Schools/Universities/Colleges**
   a. Student Exams
   b. Knowledge checks
   c. Learning through testing
   d. Learning Management System (LMS)

4 How is YouTestMe different from similar systems?

4.1 "On-Premise" Deployment Option

"On-Premise" deployment option is a solution where customer installs and controls YouTestMe software in their data center. It is the best option for companies and institutions where control, data privacy, and security are of the most significant concern.

4.2 Distributed as a Virtual Appliance

Option 1: YouTestMe products are delivered as a Virtual Appliance, a preconfigured "turnkey" solution that simplifies deployment for our customers by eliminating the need for manual configuration of the Virtual Machines and Operating Systems used to run the appliance.

Option 2: The YouTestMe system is distributed as a Virtual Appliance, which makes it extremely easy to install, configure, maintain, and migrate from one server to another. It also makes it possible to run on a wide variety of hardware and software platforms (Windows, Linux, ESXi, etc.). A customer is in full control of application and data, which can be easily migrated to any server or location. Customization Options A custom solution can be developed around the YouTestMe system. YouTestMe is suitable for quickly delivering exams (knowledge testing) and learning management system solutions for customers with specific requirements.

4.3 Integration with other systems

The YouTestMe deployment solution can be integrated with existing systems. For example, the YouTestMe knowledge testing application can be integrated with authentication systems (single sign-on), document management systems, e-commerce, etc.

4.4 Integrated Enterprise Technologies and Technical Solutions

The YouTestMe system is developed by integrating superior enterprise technologies into highly scalable and configurable Virtual Servers. The YouTestMe platform can be used to deliver a custom, highly scalable, and reliable solution that can fulfill the needs of large corporations, organizations, and governments.

5 YouTestMe Software Purchase Options

YouTestMe is offered as:
- Software for purchase
- Rent the software/service

YouTestMe software can be hosted:
- On-premises
- On the cloud

	Software Ownership	Renting Software
Hosting on Premises	**Pros:** Maximum flexibility and control Maximum security **Cons:** the purchase of the software is a requirement. YouTestMe offers "rent to own option."	**N/A**
Hosting on Cloud	**Pros:** Cost-efficient solution. YouTestMe offers the option to host applications on their cloud or cloud of your choice. **Cons:** Dependency on cloud rules and policies Data is stored outside of an organization.	**Pros:** Cost-effective solution **Cons:** Limited options and control. Usually is what you see is what you get. The capabilities of the software will limit your business. YouTestMe offers an option to switch from renting to owning the software, customizing it, and adapting to meet your business requirements.
