## **1** Introduction

YouTestMe GetCertified is a Web-based training, knowledge evaluation, certification, and surveys (LMS) application. It comprises advanced user management, question pool management, comprehensive reports, and a test generator.

The document contains instructions for the initial configuration of the new release of the GetCertified application once you have completed the installation process and network setup of the YouTestMe Virtual Machine according to the Installation and Support Manual.

## 2 Logging into the Application

You will be able to access the GetCertified application using any browser via the following URL:

#### http://[YouTestMe\_VM\_IP]:8080/ytm1/login.xhtml

**Important:** It is assumed that your workstation resides in the same network as the YouTestMe Virtual Machine or that you employ the VPN connection. For more details, contact your Network Administrator.

The IP address "**192.168.1.100**" used in the picture below is for demonstrative purposes. The actual IP is configured during the initial network setup of the YTM Virtual Machine.

The login screen should resemble the picture below. Note that the logo and colors may vary depending on application branding.

# **3 Initial Configuration**

#### 3.1 User Accounts

When logging in for the first time, you can use the following accounts:

Username	Password	Description			
admin	Admin12#	All permissions enabled			
instructor	Instructor12#	Create tests and organize test-takers			
student	Student12#	Limited access - only take tests			

We strongly advise you to change the predefined password upon the first login. The operation can be applied to the personal profile screen under the "My profile" page.

<b>?</b>	My profile	Options  Q Search anything	0		0						
»	Information My groups My	pools My activity log My subscribers My favorite reports My achieved certificates			admin	n					
58	Account information	Password settings		•	Administ	ator					
45	Personal information	A set of rules designed to enhance application security by encouraging users to employ strong passwords.	L	My	profile						
<b>0</b> 1 <b>0</b> 3	Password settings	Must between 7 and 100 characters long.     Must contain at least 1 digit (0-9).		Log	jour						
٢	Two-factor authentication (2FA)	• Must contain at least 1 uppercase letter (A-Z).         • Must contain at least 1 uppercase character (a-z).         • Must contain at least 1 special character (!*#\$%&()*+;/:<=>@[\]^_(]~).									
6	Attachments	Change password									
ē											
-											

#### 3.2 Mail Server

YouTestMe GetCertified supports a feature that sends email notifications for specific events (receiving test requests or role changes). To properly set up this feature, entering the mail server parameters into the administration panel is necessary. See the picture below for an example with dummy data:

	Settings and customization						
Home	System preferences Theme and	language Notifications Job scheduler Support Attachments library Custom properties					
	Date and time	Email server					
Assignments 👻	Web session parameters	Choose the mail server and configure mail server settings by defining system email and job mail parameters.					
👪 Users 🔻	Internal network	Select one smtp.gmail.com					
Tests 👻	Password configuration						
Testing center	Test booking settings	Host					
Surveys	Test cancellation settings	smtp.gmail.com					
Training courses	Attempt continuation settings	Port					
Peparting	Test authorization limit	587					
System	Answer ordinal markup	SMTP Auth					
	Score report setup	Username					
Settings and customization	Knowledge deficiency report setup	ytm.system@gmail.com					
Integrations	Additional modules setup	Password					
Maintenance	Email server	*Baniv th' address					
	Upcoming tests reminder	ytm.system@gmail.com					

The system will come with a predefined Google Mail account and server. Changing the parameters into your institution's mail server parameters is strongly advised.

### 3.3 White Labeling

GetCertified allows you to modify the URL (link) of the application in the emails sent from the system.

To change it, search for the option "Application link" under "System -> Settings and customization -> Theme and language -> White labeling" page.

	fied	Settings and custo	mization						
Home	**	System preferences	Theme and I	anguage	Notifications	Job scheduler	Support	Attachments library	Custom properties
		Theme		White	e labeling				
Assignments	Ť	White labeling		Manage a	nd customize the text o	the login page, system n	aming, and pop-up	windows for instructions. Play	video
Users	*	Logo and favicon		Web brow GetCe	ser's tab title			0	
Tests	*	Language settings		Confirmat	ion label			0	
Surveys	•	Language bundles		$\begin{array}{c c c c c c c c c c c c c c c c c c c $					
Training courses	¥	Message templates							
Reporting	¥
