1	Int	roduction	2
	1.1	Precondition – Accessibility mode	2
2	De	scriptive links	4

## 1 Introduction

This document's purpose is to show that links have descriptive texts. The purpose of each link can be determined from the link text alone or the link text and its context.

#### 1.1 Precondition – Accessibility mode

To enter accessibility mode, follow these steps:

1. In the Users section, select My Profile.

		Homepage			C Search anything
0	Home	Welcome name surname, Your role is Administrator.			Recent activity 💶
8		Administrator. A role with all permissions in the system. Administrator is	s able to manage everything in the system.		Test "dsfsdf" is started 4 days ago
*	Users	Wy tests  View the list of tests you can edit, grade or monitor depending on the role assigned to you.	Create a user profile with a pre-created role in accordance with required permissions. 	E-testing center				
	Surveys				
Ŧ	Training courses				
8	Reporting				

2. In the **Information** tab, select the **Accessibility** menu option and make sure the "Turn on accessibility mode" option is checked.

#### 2 Descriptive links

Certain links in the application lead to YouTube video instructions. They are colored blue and have a play icon on their left side. They have descriptive names, such as "Instructions for test retakes", as opposed to "Play video", as they were previously named.

New test		Q Search anything	0 0
	Enable proctoring ①		
	Pause and repeat settings		
	Allow test continuation ①		
	Allow test retaking		
	Additional possibilities for candidates		
	Enable 'I don't know' answer to avoid negative points		
	Enable answer feedback 💿 💽 Instructions for answer feedback		
	Show question metadata to candidate		
	Enable notes (2) Constructions for note-taking	_	
	Test taking limitations		
	Require answering all questions		
	Disable going backwards in test		
	Disable answer deselect ①		
	Security and data control		
	Automatically log out candidate after finishing.		

When selecting a link, a YouTube video opens in a new tab.

Other links in the application are connected to feature-explanatory articles. They are usually gray instead of blue. Their names have been changed from "Read more" or "Learn more" to descriptive ones, such as "Predefined reports explained".

		Predefined reports		Q. Search anything	0 0 📍 🎒
	Gutoning	Reports for various categories Predefined reports explained	+

Since the screen reader does not read the dialogue text but reads labels and links, it is necessary for them to be descriptive. In the example above, link number 1 contains an Excel template downloaded to your computer, and link number 2 leads to a PDF file opened in a new tab.
