How to use the "Skip navigation" button

Table of Contents

- 1 Introduction..... 2
 - 1.1 Precondition - Accessibility mode 2
- 2 Skip navigation button 3

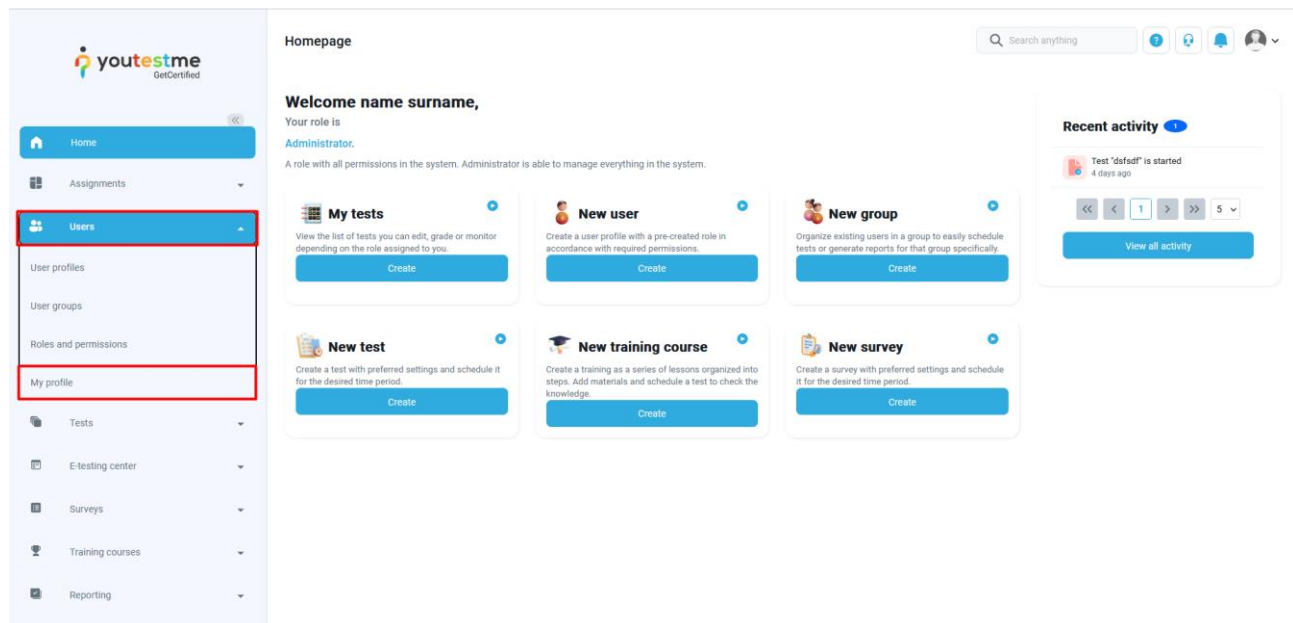

1 Introduction

This document's purpose is to explain how to use the **Skip navigation** button, created for bypassing repetitive steps. This button is designed to be used in conjunction with the **Tab** key.

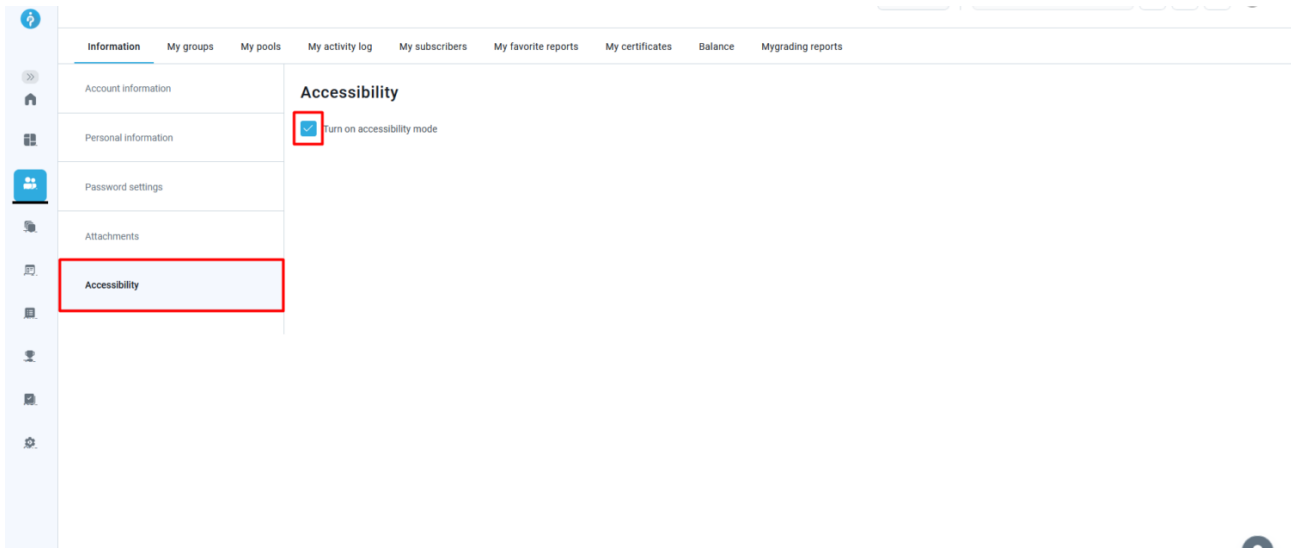

1.1 Precondition - Accessibility mode

To enter accessibility mode, follow these steps:

1. In the **Users** section, select **My Profile**.

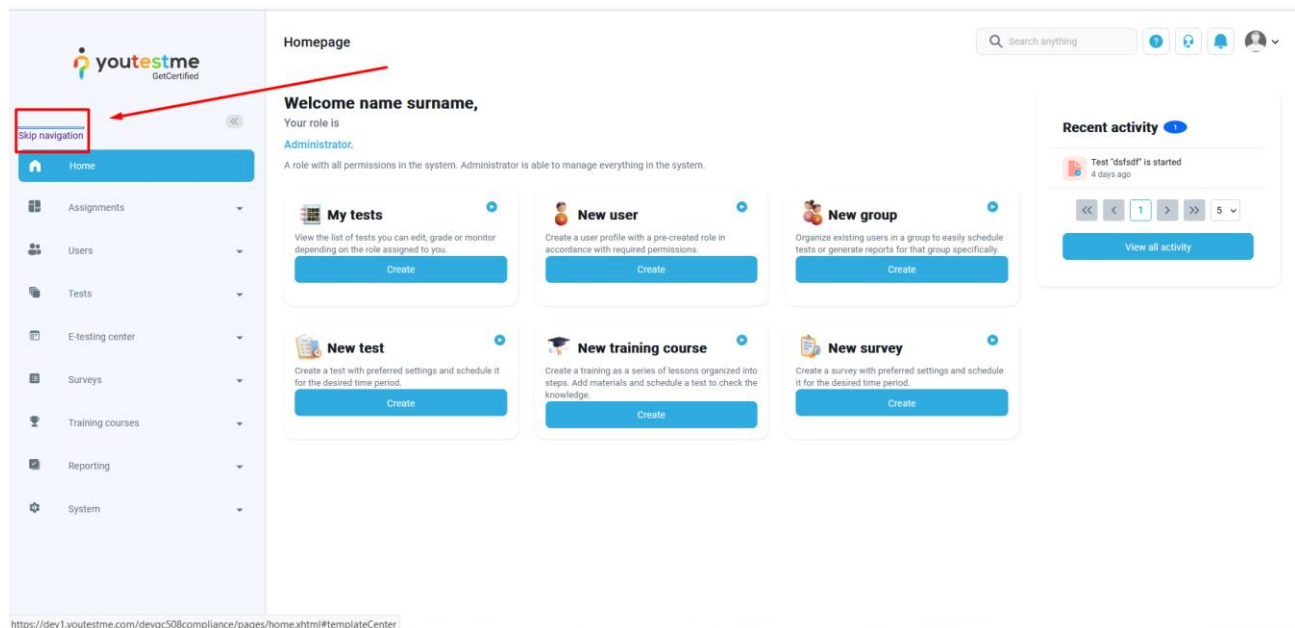

- In the **Information** tab, select the **Accessibility** menu option and make sure the "Turn on accessibility mode" option is checked.

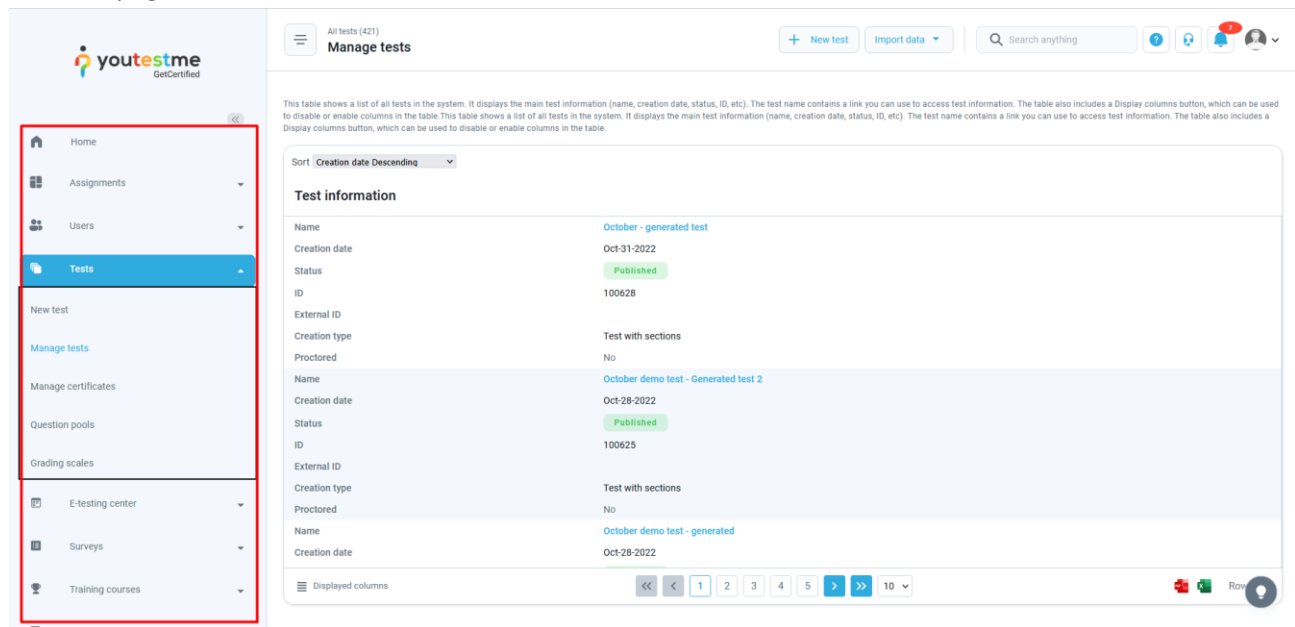

2 Skip navigation button

The **Skip navigation** button, found in the top left corner of the application, is hidden by default. The button is revealed in interaction with the **Tab** key. Once it appears, use the **Enter** key to activate it.

The **Skip navigation** button facilitates skipping unnecessary actions, such as going through the left-side menu when there is no need. Instead, the menu is skipped over altogether, and the **Tab** key moves to the selected page.
