#### **1** Introduction

This document's purpose is to explain how to create branching questions. The branching option allows you to define the next question for each original question. You can use branching in three types of questions:

- 1. Single choice (all scoring methods).
- 2. Multiple choice ("by the combination of answers").
- 3. True/False (all scoring methods).

Please note that the branching is not available for the mentioned question types if you add assistance to the question.

#### 2 Adding Questions to a Question pool

1. To add questions into a question pool, navigate to Tests/Question pools.

2. To add questions into a new question pool, click the **New** button.

3. Add a pool name, optionally description and external ID, and save it in the pop-up window.
