	Multiple choice question type	
4	Scoring method – By answer weight	. 5
5	Scoring method – By combination of answers	.6

# **1** Introduction

This document's purpose is to explain the requirement R02 - Multiple response (select more than 1 choice - pick the best 3 of 8 possible responses). Must be able to limit the number of selections the student can make. Ability to assign different point values to each choice option.

#### 2 Adding Questions to a question pool

To access the question pool, you should navigate to **Tests** and select **Question pools**.

# 4 Scoring method – By answer weight

The scoring method **By answer weight** allows you to define points for each answer. A candidate will be awarded different points depending on the answer chosen.

To create a multiple-choice question with a scoring method **By answer weight**, you should:

- 1. Set the scoring method to "By answer weight".
- 2. Define the points for each answer.

# 5 Scoring method – By combination of answers

The scoring method **By combination of** answers allows you to predefine the combination of answers the candidate should select to obtain points.

To create a multiple-choice question with a scoring method **By combination of answers**, you should:

- 1. Set the scoring method to **By combination of answers**.
- 2. Click on the Add combination button.
- 3. Click on the plus icon next to the answer text to include an answer into a combination.
- 4. Define a number of points a specific combination will carry.
- 5. Click the **Save** button.
