	Make sure you grade the attempts if they require manual grading. Depending on the "Show report" option settings, if verified, test results that are not graded fully may not be displayed to candidates. Subsequent changes to the verified results are not possible. To verify tests that are not attempted, change the results status to "Did not show up" first. Are you sure you want to verify attempts?
	Yes No

If we now export again the compilation status as Excel file, we can see the results of students whos results should be inserted in the LMS.
