1 Introduction

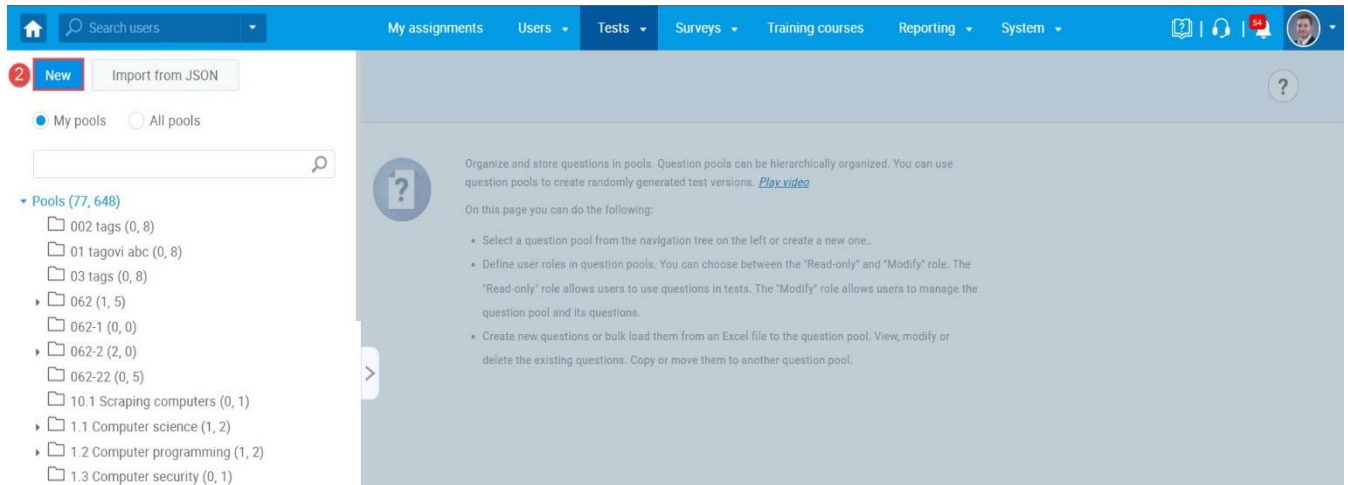

This document's purpose is to explain how to create matrix questions and add them to the new-created or existing question pool.

2 Adding Questions to a Question Pool

1. To add questions into a question pool, navigate to "Tests/Question pools."

2. To add questions into a new question pool, click the "New" button.

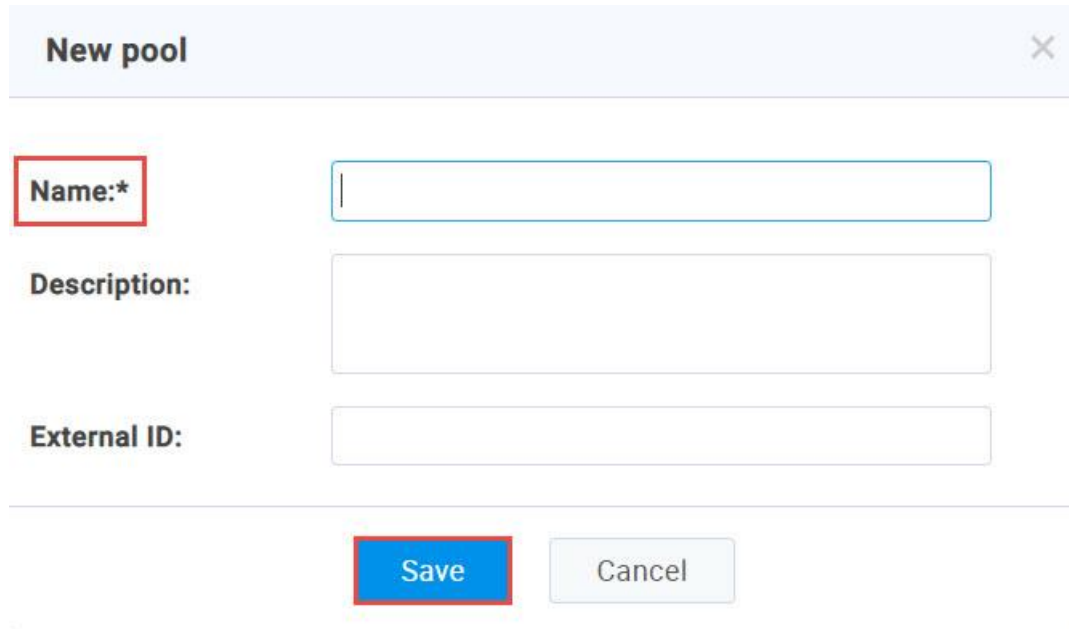

The screenshot shows the Youtestme interface. At the top, there is a navigation bar with options: My assignments, Users, Tests, Surveys, Training courses, Reporting, and System. Below this, there is a 'New' button and an 'Import from JSON' button. A search bar is present, and a list of question pools is displayed on the left. The list includes:

- 002 tags (0, 8)
- 01 tagovi abc (0, 8)
- 03 tags (0, 8)
- 062 (1, 5)
- 062-1 (0, 0)
- 062-2 (2, 0)
- 062-22 (0, 5)
- 10.1 Scraping computers (0, 1)
- 1.1 Computer science (1, 2)
- 1.2 Computer programming (1, 2)
- 1.3 Computer security (0, 1)

The main content area on the right contains a help section with a question mark icon and text: "Organize and store questions in pools. Question pools can be hierarchically organized. You can use question pools to create randomly generated test versions. [Play video](#)"

3. Add a pool name and save it in the popup window.

The screenshot shows a 'New pool' popup window. It has a title bar with a close button (X). The form contains three input fields:

- Name:*** (required field, highlighted with a red box)
- Description:**
- External ID:**

At the bottom of the popup, there are two buttons: **Save** (highlighted with a red box) and **Cancel**.

3 Adding questions

1. To add a question to a newly created or an existing question pool, select the "Questions" tab.

3. Add question text and a few items and answers.

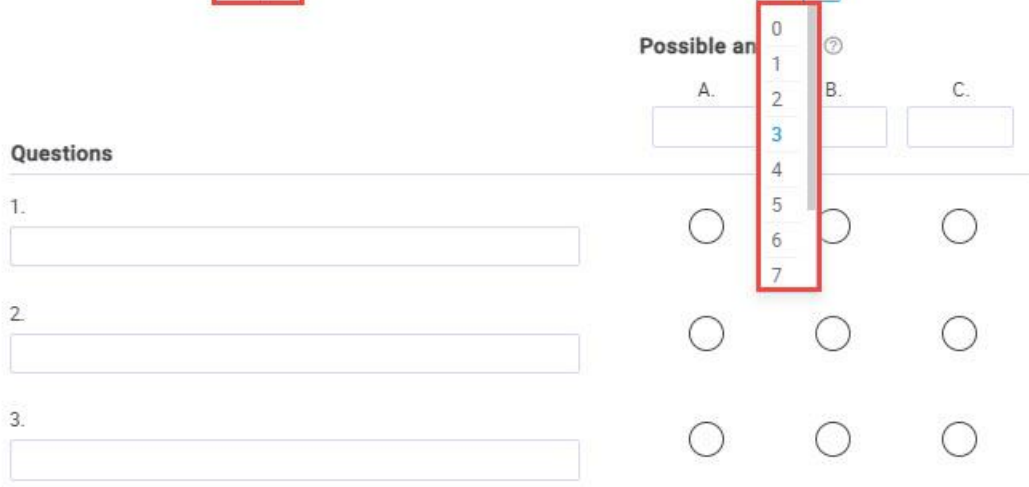

Question introduction

A rich text editor interface for adding question text. It features a toolbar with various formatting options like bold, italic, underline, and text color. The main text area contains the placeholder text "Question text" with a red circle containing the number "3" next to it. At the bottom right, there is a green circular icon and a link that says "Add question feedback".

Matrix dimensions

Number of questions: Number of possible answers for each question:

The matrix configuration interface. It shows a grid of possible answers for three questions. The columns are labeled "Possible an", "A.", "B.", and "C.". The rows are numbered 1, 2, and 3. A dropdown menu is open over the "Possible an" column, showing a list of numbers from 0 to 7, with the number 3 highlighted. Below the grid, there are three input fields for question text, each preceded by a number (1., 2., 3.).

4. Add text to all the elements and specify the correct answers:

Question introduction

Rich text editor with toolbar (bold, italic, underline, strikethrough, link, unlink, list, indent, outdent, undo, redo, fullscreen, print, help) and a text area containing "Question text". Includes a "body p" status bar and an "Add question feedback" link.

Matrix dimensions

Number of questions: Number of possible answers for each question:

Possible answers

A.	B.	C.
<input type="text"/>	<input type="text"/>	<input type="text"/>

Questions

	A.	B.	C.
1. <input type="text" value="Answer #1"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
2. <input type="text" value="Answer #2"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/> 4
3. <input type="text" value="Answer #3"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

You can also specify answer weights by hovering to the score method section and clicking on the “Answer by weight” option.

Basic settings

Define how the answer to the question will be graded. Points, penalty, and duration are default values that can be overridden during the test creation process.

Scoring method: Defining correct/incorrect answers Matrix

Points: Defining correct/incorrect answers

Duration: By answer weight

Manual grading

Generator settings

Label question by a difficulty to prepare them for the Test generator or just for better organization. Tune the level of appearance in randomly generated tests by specifying the frequency factor.

Difficulty: Medium

Frequency: Normal

Advanced question setup

Create multi-dimensional question structures by utilizing question branching. Use tags for better question organization and advanced searching.

Questions	A.	B.	C.
1. <input type="text" value="Answer #1"/>	<input type="text" value="-1"/>	<input type="text" value="-1"/>	<input type="text" value="5"/>
2. <input type="text" value="Answer #2"/>	<input type="text" value="-1"/>	<input type="text" value="5"/>	<input type="text" value="-1"/>
3. <input type="text" value="Answer #3"/>	<input type="text" value="5"/>	<input type="text" value="-1"/>	<input type="text" value="-1"/>

After defining the questions and answers, click on the “Add to the pool” button to save your question into the question pool.

Assistance

Define the optional assistance that will make answering the question easier. If the candidate chooses to use the assistance, a penalty will be applied to the question score. If you define the assistance to the question where the branching is allowed, the branching option will be disabled.
