2	.2	Candidate's perspective	. 5

## 1 Introduction

This document explains how to achieve the following requirement:

• The test or survey creator needs the flexibility to create a test or survey with all possible question types described in this RFI within one test or survey. Example: A pull-down menu in which the creator can pick a single question with one correct answer, then the second question might be a fill-in-the-blank, the third may be a branching question, etc.

Text and images may be needed to be displayed for one question or all test questions.

The test or survey creator needs to be able to create sections where some test questions cannot be revisited, and others can be revisited.

### 2 Steps

#### 2.1 Creating a test with sections

Hover over the "Tests" in the main menu and select "New test".

How to create test with all question types described in this RFI and enable or disable revisiting the sessions

Enter the basic test information in the first step of the test creation process and check the **"Test with sections"** option. Then click the **"Next**" button.

f		•		My assignme	nts Users <del>-</del>	Tests 🗸	Surveys 🗸	Training cour	ses Re	porting 👻	System 👻	🛛 💷 i 🕄 i 🔍	•

#### 2.2 Candidate's perspective

The created test has two sections. The "**Disable going backwards in test section**" option is selected in the first section, and in the second section, this option is unselected.

**The first section** - The picture below shows that there is no "**Previous question**" button, meaning that the user will not be able to return to the questions that precede the question he is currently on.

Demo Topic Area Test > Enterprise Module		Finish sec	tion Finis	sh test
Question: 2/8 Type: True/False Points: 4 Penalty: 0 Difficulty: Medium	Ξ	Section progress bar		2/8
If you pass the second person in a race you take the first place.		Test		Section
1. True	0	Section name	Started	Finished
2. False	0	1. Enterprise Module     2. Technique Module	UTC	
	Next question	3. Trade Module		

**Note:** The user will not be able to go back to the previous question nor over the question summary box.

**The second section** - The picture below shows a "**Previous question**" button, which means that the user will be able to return to the questions that precede the question he is currently on using the "**Previous question**" button and the question summary box.
