### **1** Introduction

This document describes the process of importing questions through Excel files. The process and data are tailored to National Geospatial-Intelligence Agency workflow and samples.

#### 2 Excel Import

YouTestMe GetCertified supports simple and efficient data upload (questions, tests, and users) through predefined Excel templates. The process is very straightforward and allows the import of a large number of items simultaneously and preparing data offline.

To import your sample questions through Excel files, please follow the instructions below:

1. Hover over the Tests tab in the main bar and select Question pools.

2. Create a new pool and specify its name and optional description.

## 3 Alternative Options

#### 3.1 Data Load Services

The YouTestMe team offers data load services to facilitate the process of data import to our clients. All you need to do is send us a list of questions in any format you have them stored in, and our team will do the rest. The data load services are additionally charged and available on-demand – you can request them at any point of usage.

#### 3.2 Customization Options

YouTestMe specializes in customization processes and can modify any feature or functionality according to your needs. In this case, if you have your questions stored in Word files, our team can develop a Word importer that would work on a similar basis as an Excel importer.
