## YouTestMe Demo Notes

## 21 September 2021 @ 1200 Eastern

Attendees	
YouTestMe	GPC PMO
Aleksandar (Alex) Nikolic	Charles Christ
Katarina Jeremic	Keesha Green
	Chrissy Noel

Alex (YouTestMe) began by providing some background on the platform and a selection of the clients they already support, including DIA and FBI

The software is a pre-loaded virtual machine that allows for multiple instances (i.e., it can support both domains)

Digital testing is also available in austere environments via LAN-enabled laptops—this could move the PMO one step closer to online testing (YouTestMe partners with Proctorio for online testing)

<u>Note from YouTestMe</u> - For more information on off-the-grid testing in areas without electricity and Internet connection, please take a look at <u>this document</u>.

To get an insight into automated proctoring process via integration with Proctorio, you may watch <u>this video</u>.

## <u>Demo</u>

• Reviewed each of the modules of YouTestMe, including Users, Tests, Surveys, Training Courses, Reporting, and System.

<u>Note from YouTestMe</u> - You may find an overview of these modules at the following links:

- o <u>Users Module</u>
- o Creating a Test
- o <u>Test-taking Process</u>
- o <u>Surveys</u>
- o Training Courses
- o <u>Reports Overview</u>
- o System Settings
- The PMO clarified some of our requirements to help guide the demo, including that we are a paper/pencil certification office looking for an item banking and test development solution.

## UNCLASSIFIED

<u>Note from YouTestMe</u> - YouTestMe GetCertified fully supports paper-based testing, allowing our users to create tests within the application, <u>export them to a print-ready PDF</u> and distribute them to candidates via email or in a paper form. With YouTestMe GetCertified you can also <u>generate answer keys</u>, which can help you quickly evaluate paper-based tests, or grade your tests automatically using <u>OMR/OCR bubble-sheet scanner</u>.

• Users can be entered into the system either individually or via file upload; this process can also be automated via a "Job scheduler" to automatically upload data with any level of regularity.

<u>Note from YouTestMe</u> - Please take a look at the following videos that demonstrate these mechanisms:

- o Adding users manually
- o Bulk import of users
- o Job scheduler
- Users are organized into hierarchical <u>user groups</u> (e.g., certID or organization)

<u>Note from YouTestMe</u> - Users can also be assigned permissions which restrict what they can access and what they are able to do within the item bank – SMEs will only have access to what the PMO specifies. Please take a look at these videos that demonstrate how to efficiently organize users and control their access to the application modules:

- o <u>Roles and permissions</u>
- o <u>Division organization</u>
- YouTestMe has the capability to develop "importers" that can read the PMO's existing item banks and potentially reduce the startup time by a significant amount of work
- YouTestMe supports all of the PMO question types currently in use.

Note from YouTestMe - You may see all supported question types in this video.

• Tests can be generated by selecting one or more question pools and adding random questions from those pools; also, manually generated tests allows the test development team to select the items to be used on a test.

<u>Note from YouTestMe</u> - These videos demonstrate the methods for creating a test:

- o Manual test creation
- o Manual creation of multiple test versions
- o <u>Test generator</u>
- Tests can be exported to pdf to be administered via paper/pencil

- Test results can be uploaded from existing databases
- Reports can be built and executed to export results for psychometric analyses, allowing for customizability with regard to what fields will be exported.

<u>Note from YouTestMe</u> - To get an insight into reporting system, please take a look at:

- o <u>Reports Overview</u>
- o <u>Report Builder</u>
- YouTestMe has a great degree of flexibility and configurability to adapt to some of the PMO's niche needs such as custom test form templates, additional item data, and customizable imports.

<u>Note from YouTestMe</u> - Please visit <u>this link</u> to find out more about our typical customization process.

• YouTestMe has experience with integrations including database connections and authentication mechanisms.

<u>Note from YouTestMe</u> - You may learn more about our integration capabilities and experience on <u>this webpage</u>.

- The tool is installed on the network and accessed by users via any internet browser.
- YouTestMe can support classified programs/tests, leveraging an On-prem solution where clients host the data themselves.

<u>Note from YouTestMe</u> - Please find our security-related documentation at the following links:

- o <u>Security Hardening</u>
- o <u>Security Policies</u>
- o <u>Data Privacy</u>
- o GDPR Compliance
- o Installation and Support Manual
- o Business Continuity Planning
- In addition to monthly and perpetual licenses, YouTestMe provides multi-year deals at the monthly rate

Pricing Options – Enterprise Solution	
Monthly	Perpetual
\$6,800.00	\$288,000.00

<u>Note from YouTestMe</u> - Please find a pricing document for purchasing an on-premise solution at <u>this link</u>. YouTestMe will subsequently provide a custom multi-year pricing offers.
