1 Basic Information

YouTestMe Get Certified allows users to import questions with images into the desired question pool quickly and efficiently using a predefined YTM Excel format. To load the questions with images, you need to upload the .zip file containing one folder with images and Excel file template with questions and answers.

Excel template consists of three sheets:

Sheet 1: Questions – On this sheet, it is necessary to enter all data for the questions being imported into the selected pool.

Note: Hotspot, Matrix, and Branching questions are not supported.

Sheet 2: Answers – On this sheet, it is necessary to enter all possible answers offered for the questions in sheet 1.

Sheet 3: A legend with predetermined codes explained.

1.1 Sheet 1: Questions

The data that needs to be entered to import questions are shown and explained below.

Name	Description	The type of input	The default value for empty optional fields
Question ID*	A unique number that identifies the question and is used to link the answers to the questions. The image name must match the question ID.	Type a numeric value	/
Question text*	Question text	Type the text	/
Question type*	Use the predetermined code to select the question type	Select from a list	/
Duration	Express the time in seconds to time limit the question answering. This time limit is used only if the test duration option is set to "Time per question."	Type a numeric value	00:00:00
Difficulty code	Use the predetermined code to set the question difficulty that can later be used when generating different versions of the test.	Select from a list	Medium
Points	Set the number of points each question carries - must be greater than zero.	Type a numeric value	1
Frequency factor	Define how likely it is for the question to appear in a generated test.	Select from a list	Normal
Penalty	Set the number of negative points for incorrect answers.	Type a numeric value	0

1.2 Sheet 2: Answers

The data that needs to be entered to import answers are shown and explained below.

Name	Description	The type of input
Question ID*	Enter an ID that links answers to the question. If the question has multiple answers offered, you should enter the same ID in more fields.	Type a numeric value
Answer text*	Answer text	Type the text
Answer ordinal number*	Determine the order of the answer	Type a numeric value
Correct Answer*	Set whether the answer is correct or incorrect. The field's value could vary depending on the question type.	Select from a list

2 Creating a .zip file that contains questions with images

To upload the questions with images in the pool, the user should create a .zip archive that contains a folder with images and the filled-in Excel upload template. Only the .zip file format is supported.

Note: To successfully upload questions with images in the question text, the image names should match the question IDs.

For example, if the Question ID value is 1, the picture name should be "1".

The preview of named images inside the folder should match the Question IDs.

Note: You don't have to add a picture to all the questions.
