1 Introduction

This document will explain to you how to organize questions into question groups.

2 Required knowledge for understanding this document

• How to create a simple test

3 Creating a question group

Once you add the questions you want to be in the test ("Add questions" tab), you can assign an appropriate group to each of them. The question group allows you to organize multiple questions into a group, add its short description and multimedia (image, audio, video), displayed with each question within the group.

Note, question groups can only be added in the test, not the pool.

First, open the question by clicking the "Pencil" icon.

Then follow the steps to create the question group:

- 1. Click the "New" button to create a question group.
- 2. Enter the group name.
- 3. Enter text and attachment which will follow each question included in the question group.
- 4. Click the "Save" button.

To create another question group, repeat the steps above. You can create as many groups as you like.
