Quick actions

1. Quick actions

In the **"Quick actions"** panel you can find shortcuts to standard actions, such as:

1. **"Create user"** – Create users by inserting their personal data. An email with the login credentials will be sent to each newly created user. For more information please visit **Create new user**

2. "Create security role" – Create new security role by choosing specific sets of permissions. Each user needs to have a security role assigned in order to access system functions and data. For more information please see Roles and permissions

3. **"Create user group"** – Create multi-leveled groups to organize users better, and to easily distribute and examine the test results. If you need help with this you should visit Manage groups

4. **"Create test"** – Create tests manually or by using the test generator. Optionally, attach an appropriate certificate. If you need help with this you should visit New test

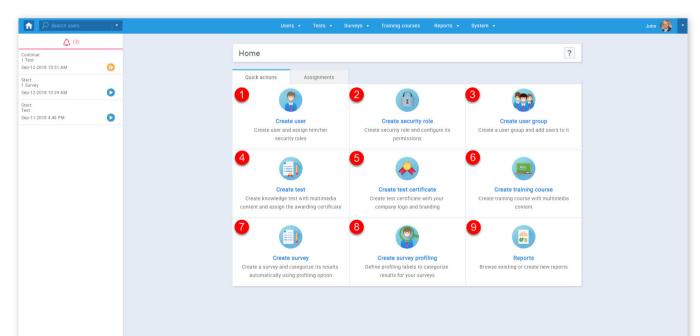

5. "Create test certificate" – Add new certificates by inserting your company logo and branding. If you need help with this you should visit Manage certificates

6. "Create training course" – Create training courses with steps and enrich them with different multimedia files. If you need help with this you should visit Training courses

7. **"Create survey"** – Create a survey and categorize its results automatically by using the "Profiling" option. If you need help with this you should visit New survey

8. "Create survey profiling" – Define appropriate profiling labels to categorize results for your surveys. If you need help with this you should visit Profiling

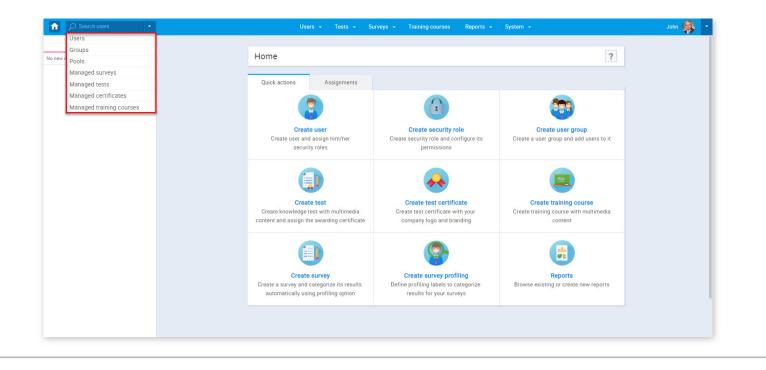

9. **"Reports"** – Find an adequate report related to a specific application module and examine its results. If you need help with this you should visit **Standard report**

In the top left corner, you can find a search bar. You are able to choose the filter for searching. Available filters are "Users",

"Groups", "Pools", "Managed surveys", "Managed tests", "Managed certificates", "Managed training courses".

Quick actions

Manage users

In this section, you can create new users and manage registration requests, see the list of users you created and the list of all users.

1. Accessing the page

To access the **"Manage users"** page, you should hover over the **"Users"** section in the application's main menu, and then select the **"Manage users"** option.

2. List of all users

This table displays a list of all users in the system including the list of deleted users (special permission is required to view these users). In the list of all users you can change their status to "Active", "Locked", "Suspended" or "Deleted".

	Show deleted users

- 1. Select the members whose requests you want to approve/decline
- 2. Click the "Action" button and choose the desired action

5. Create new user

In the **"Create new user"** panel you can manually add a new user by inputting his/her personal information and setting his/her role. A new user profile is created by inputting user information, password, and a profile picture. On this screen, a user is also assigned a security role. The new user will be notified by email that their profile is created in the YouTestMe system.

List of all users	Users created by	me Registration reque	sts Create new user

1. Insert username. This value has to be unique for each user

2. User's email address

3. User's first and last name

4. This value represents the current status of the user's account in the system. You can choose between:

"Active" - "Active" users can enter the application

"Suspended" - User with the administrator role can change the status of any student into "Suspended". Users cannot enter the system until the administrator changes their status to "Active" again, but their statistics are still shown

"Locked" - The user's account becomes locked after 21 failed login attempts. The "Locked" user needs to follow the "Forgot password" procedure (if you need help with this, go see Signing in/Registration), and will be able to gain the status of an "Active" user again. As the administrator, you can change the status of a "Locked" user by going to his profile and clicking the "Activate" button after which the system will automatically send the email with a newly generated password. This is possible only if the mail server is activated. If the mail server is not activated, the administrator needs to change the user's password manually.

9. Here you can enter personal information about the user

10. After entering all the necessary information about the new user click the "Create" button

Manage users

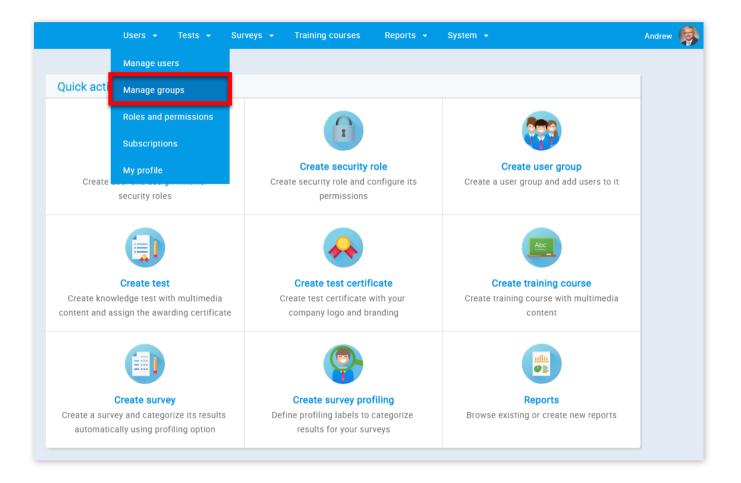

Help system

Manage groups

Users in the system can be organized into user groups. Each group can have an unlimited number of sub-groups. Members of a certain user group are also members of its parent group. Users with proper privileges can make their own tree hierarchy of groups, while users with administrative privileges can manage any group in the system.

1. Accessing the page

To access the "Manage groups" page, you should click on the "Users" menu and select "Manage groups".

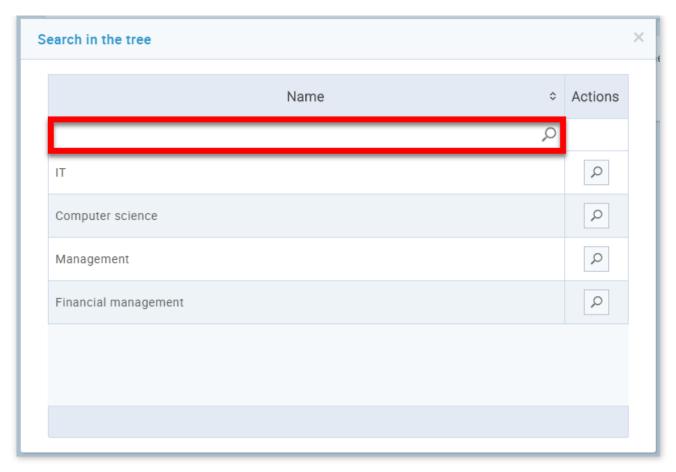

2. Page layout

On the left side of the **"Manage groups"** page, you will find the sidebar where you can search for groups, filter them, create a new one or select a group to see its detailed information and modify it.

↑ Search users	Users - Tests - Surveys - Training courses Reports - System -	
L (1) User groups P Create	User groups	Help
User groups (4) 2 ▶ □ IT (1) (4) 4 ▶ □ Management (1) 4	Select a group from the navigation tree on the left or create a new one. Add new members to the group. Groups can be used for easier test assigning process.	

1. To search for a group, you must click on the button with a magnifying glass image and then enter the name of the group in the pop-up window.

2. In order to filter the list of tables, you should click on the button with a funnel image and then choose the group status and privacy of the groups you want to see. A group's status can either be "Active" or "Inactive". Only the users from "Active" groups may be added as members to tests and pools. If a group is set to "Inactive" then all of its sub-groups are set to be inactive automatically. The "Privacy" setting has two options, you can either set it to "Personal" or "All". If you choose "Personal", only groups where you are a member will be displayed, and if you choose "All", all existing groups will be displayed.

E (0) User groups P V Create	User groups Help	
Group status ⑦	Select a group from the navigation tree on the left or create a new one. Add new members to the group. Groups can be used for easier test assigning process.	
Privacy 🔊		

3. To create a new group, click on the **"Create"** button. Once clicked, a pop-up window will open where you need to set the name and the description of the group, and the group's status as well.

New group		×
Parent group:	Groups	
Name:*		
Description:*		
Status:*	Active Inactive	

4. To view information about a group that exists or to modify it, you need to find the group in the group tree. In the group tree, you will find that some of the nodes have bullets on the left. This means that the group has sub-group(s) and that you can see them by clicking on the bullet and in that way expand the node. To select a group, simply click on its name in the tree.

3. Group details

When a group is selected, you can add a sub-group to the selected group, you can look at the additional options for that group, or you can view the detailed attributes of the group on the **"Information**", **"Members"** and **"Statistics"** tabs.

Updated by:	Andrew Ivarstead		10 Update time:	Feb-26-2018 3:02 PM	

1. Group's name

2. Group's description

3. This represents the group's path. You can see all the group's ancestor groups here

4. The status of the group

5. This is the user who created the group. By clicking on the name of this user, you are redirected to his profile page

6. This is the user who last updated the group. By clicking on the name of this user, you are redirected to his profile page

7. This is the unique ID of this group. It is used in some other functionalities of the application, like importing Excel files

8. This represents your role in the group. Group members can have one out of the two roles in the group: the "User" role or the "Manager" role. Having the "Manager" role in a certain group enables the user to manage all of its sub-groups as well

9. This is the exact time this group was created

10. This is the exact time this group was last updated

4. Members

The **"Members"** tab gives an overview of all group members and allows you to add new members to the group and remove users that are already members. You can also export members into an Excel file.

	Username	\$	3 U	lser \$	Status \$	Role in group
Search		Q,	Search	Q	Select one	Select one

User			14 <4	1 2 3 4	5 ⊮ ⊧	10 🔻			Rows: 285

5. The **"Remove selected"** button will remove the selected users which are group members from the group. No action will take place for users that are not group members. Removing a user from the group will set his/her **"Role in group"** to blank

6. The **"Export as Excel"** button will export in an Excel file all the members that have been filtered as part of your search

5. Statistics

The **"Statistics"** tab displays the statistical data of members of that group.

1. When the **"Add tests/surveys"** button is clicked, a pop-up window will appear. You can search the tests/surveys you want to add or remove by name or course that they are a part of. Using the below-highlighted buttons, you can add or remove them from the graph view in the **"Statistics"** tab.

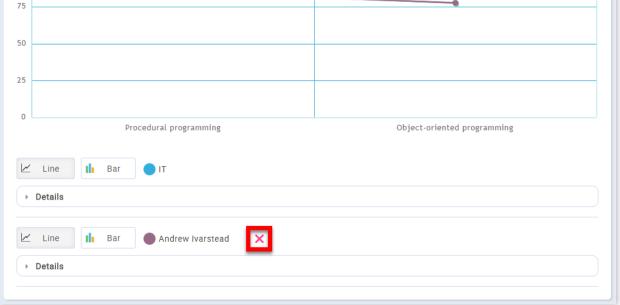

Test/survey		Course		Available period	Actions
Search	Q	Search	Q		
Object-oriented programming		IT		Jul-25-2018 12:00 AM - Jul-25-2018 1:30 PM	\downarrow ×
Procedural programming		IT		Jul-25-2018 12:00 AM - Jul-25-2018 1:40 PM	\downarrow ×

2. By clicking the **"Add members"** button, you will open a pop-up window. In this window, you can search for members whose statistics you want to see by username or by first and last name. By clicking on the button highlighted in the picture below you can add the user's statistics to the graph view in the **"Statistics"** tab.

Roles and permissions

GetCertified allows the administrator to create new and manage existing user roles and permissions.

1. Accessing the page

To manage roles and permissions, you should click on the **"Users"** menu in the application's toolbar and then choose **"Roles and permissions"**.

2. First page

"Roles and permissions" is another section under the "User" management menu. It allows the administrator to create new and manage existing user roles and their permissions. On the top of the page there is a search bar, where you can choose a role and view its permissions.

Subscriptions

On the "Subscriptions" page you can add people that will receive regular reports for a selected user.

1. Accessing the page

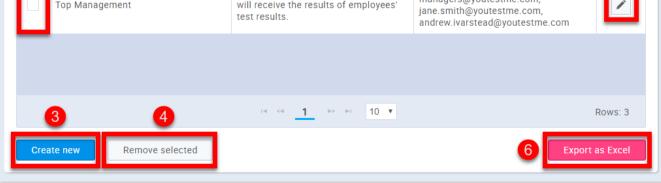

To access the "Subscriptions" page, you should click on the "Users" menu and select "Subscriptions".

2. Page layout

On the **"Subscriptions"** page you will find a list of subscriber lists as well as options for creating new lists, removing and modifying existing lists and exporting the subscriber lists in an Excel file.

ıbscri	iptions				?
Subscribe	er lists				
	List name	÷	2 Description \$	Subscriber emails \$	Action

My profile

GetCertified allows you to have a good look at your personal information.

1. Accessing the page

To access the **"My profile"** page, you should click on the **"Users"** in the application's toolbar, and then choose **"My profile"** or click on your name in the top right corner of the application.

2. Information

Once you access your profile page you will see your certificates on the left sidebar and a panel with your personal information. In the **"Information"** tab as an administrator, you can change any of your personal information and create/modify/delete other users when you are on their profile. On the Personal profile panel, you can also:

- 1. Change your password
- 2. Enable all hints if they are disabled
- 3. Disable all hints if they are enabled
- 4. Suspend your account
- 5. Lock your account
- 6. Delete your account

ATTENTION: If you are the only administrator in the application, by choosing "Suspend", "Lock" or "Delete", no one will be able to administer the application. In this case, contact YouTestMe Support.

Help system

New test

The test creation process happens inside the "Test generator". The Test Generator is an advanced GetCertified feature whose primary purpose is to reduce the amount of time spent on test creation and evaluation. It is very simple to use, all you need to do is to enter specific test parameters, assign questions and choose the pass mark, attach a certificate and test instruction.

1. Accessing the page

The first step in creating a new test is to go to "Tests" in the application's toolbar, and then choose "New test".

2. Test settings

The Test Generator is divided into 5 steps. The first step is "Test settings".

1.Test settings	2.Questions	3.Specification	4.Certificate	5.Instructions	6.Review	>
Test information			Test settings		15 Load	Hel
Name:*		3	Test template: ⊘	Select	one	*
Description:				All	test templates	
		4	Test creation type:	⑦ Manua	lly created	-
		6	Duration type:	Unlimit	ted	*
		6	Test duration:			
		0	Network access: ②	Open a	iccess	*
		8	Show report:	Immed	liately after finishing	-

1. You should first write the name of the test you want to create

2. You can write a description of the test. However this is not obligatory

3. If someone had already created the test settings and saved them as a test template, you can select it in this field to load the settings and questions from that test

4. Here you can choose between:

1. Manually created – handpicking questions from the pool or typing them in

2. Generated – when set to this option, you may want specific question pools that will be used for generating a test

5. Here you can choose between time per test (total time), time per question or unlimited

6. If you have selected time per test here, you can set the timer for the test. The time format is HH:MM:SS

7. Here you can limit the access to test only to people within your local (internal) network or put an open access to allow access to people both inside and outside your network

8. Here you can choose the way users will see the test report. Reports can be shown after each question, on the manager's approval or immediately after test completion

9. Here you can choose if users will see both their grade and answers preview, or only their grade

10. Selecting this option allows candidates to save selected answers, take a pause and continue within the allowed time

11. Selecting this option allows candidates to re-take the test within the allowed time

12. Selecting this option will enable you to replace wrongly answered question with substitute questions. Question branching can only be used for manually created tests. Question branching cannot be used with the continuation option and does not allow randomizing questions

13. By choosing this option, the system will randomize the order of test questions in such a way so that each test taker will get questions in a different order

14. By choosing this option, the system will randomize the answers ordering on each question, in a way that for the same question each of the test takers will get a different answer ordering

15. Also, before continuing to the next step, you can upload a test created in the Excel template. If you need help with this look up Loading test from Excel

1.Te	st settings	2.Questions	3.Specification	4.Certificate	5.Instructio	ons 6.Revi	ew	>
Test information				Test settings			Load	Help

				Network access: ⑦ Show report: Report contents: Allow continuat Allow repeating Allow question	tion ⑦	Open access Immediately afte Grade and previe Randomize q Randomize a	wuestions	*

3. Manually created questions

The next step in the test creation process is adding questions. Depending on the test creation type (manual or generated), the next step varies. When it comes to creating tests manually, you can add questions in several ways.

Number of questior Total points: Total duration:		Easy ques							
				0			Import question	s from poo	pls
rotar aaration.	0 Unlimited	Medium qu Hard ques		0			Add new qu	uestion	<u> </u>
	ommed	nara quee		Ŭ			Single choice

2 Select pool:	All question types All questions types All types of question Australian Citizensh	ns (FR) iip		ble					

- 1. Click the **"Import questions from pools"** button
- 2. Select the desired pool source

	4 Close				
Question text	≎ Parent pool	\$	Difficulty	≎ Туре <	Actions
Search	Search	Q	Select one	 Select one 	12
Fill in the blanks.	All question types		Hard	Fill in the blanks	₽ ↓
A compliance professional's responsibilities include all of the following EXCEPT:	All question types		Medium	Single choice	ب
In a compliance program, tactical compliance procedures should be integrated into business line procedures, such as how to deliver a Adverse Action Notice when an application is declined. In this case:	All question types		Medium	Multiple choice	₽ ↓
Describe the concept of viral marketi	ng. All question types		Hard	Essay	₽ ↓
Reorder the following terms to get th most logical progressive sequence.	All question types		Easy	Ordering	₽ ↓
Terms: product, price, place, promoti people, process, physical evidence represent the '7 Ps' of service	All question types		Medium	True/False	P ↓

1. You can view the question by clicking the button with the magnifying glass image

2. You can manually import questions from the pool by clicking the button with the image of an arrow

3. Or you can import all questions from the selected pool by clicking the "Assign all" button

4. When you are done click the **"Close"** button

3.1. Automatically generated questions

The generated test creation includes importing "Questions" from resources – question pools. This is done by clicking the **"Add question pool"** button or even editing existing pools (if the test was loaded via template). You can include frequency factor by selecting the option **"Include the frequency factor"**.

<	1.Test settings	2.Questions	3.Specification	4.Certif	icate !	5.Instructions	6.Review	>
Questions:	12		Include the freque	ncy factor 🧿		Add question	n pool	
	Pool name	\$	Cut off date \$	Easy ≎	Medium ≎	Hard ≎	Total ≎	Actions
General Know	ledge			5	3	4	12	1
								Rows: 1

After that, it is necessary to enter question pool resources for that test, optionally defining the frequency factor and a cut-off date. The only pools that can be chosen are those where you are a member in. Entering individual questions is also possible, allowing test managers to add questions to both the test and a pool.

Specify question's frequent Total from pool: 12	Easy (0-6): Medium (0-6): Hard (0-4):	3	Select pool: Cut off date:	Seneral Knowledge	*

How many milligrams are there in one gram?	General Knowledge	Easy		Never	Single choice
	10 🔻	ia ≪a 1 2 ⊮>	₽-I		Rows: 16

1. Frequency factor is an optional feature representing several frequency attributes that can be attached to each question: "Never", "Rarely", "Normal", "Often" and "Always". Each of these attributes represents how likely is for that question to appear in the test

2. Here you can adjust the number of questions based on their dificulty

3. Another optional feature is a cut-off date. This feature serves to avoid the repetition of questions in consecutive tests. For example, last week you have created a test and you don't want to include questions from that test in the one planned for next week. Upon setting all these parameters, they can be reviewed in a table

4. Click the **"Save"** button

To see how to add a new question to the question pool, please refer to the Question pools.

3.2. Questions

GetCertificate allows you to choose between eight question types.

4. Specifications

The next step in the test creation process is **"Specifications"**. Here you can adjust the pass mark required to pass the test (and gain a certificate, if the test has a certificate)

<	1.Test settings	2.Questions	3.Specification	4.Certificate	5.Instructions	6.Review	>
Generato	r settings						Help
Pass ma	rk(%):						
			•				50

1. If the inclusive pass mark is selected, candidates will pass the test if they gain a score that is equal to or greater than the pass mark

4.1. Specifications for generated tests

If you have chosen that the test creation type to be generated this step looks a bit different.

	1.Test settings	2.Questions	3.Specification	4.Certificate	5.Instruct	tions	6.Review	3	>
Information	1			Generator settings					Help
Questions Duration:	:	12 Unlimited	2	✓ Inclusive pass I Pass mark(%):	mark 🕜			50	
Points: Easy ques	tions:	58 5	3	⑦ Test	t versions:	1			*
Medium q	uestions:	3		Points per question					
Hard ques	tions:	4			Easy	3			*
			4		Medium	5			*
					Hard	7			*
				Penalty per questio	n				
					Easy	1			*
			5		Medium	2			*
			-		Hard	3			*

1. This is the information about the test that you have already entered

2. You can adjust the pass mark required to pass the test (and gain a certificate, if the test has a certificate). If the inclusive pass mark is selected, candidates will pass the test if they gain a score that is equal to or greater than the pass mark

- 3. Define the number of different versions that will be created for this test
- 4. You can choose the number of points for the questions of the same difficulty
- 5. You can choose the penalty for the questions of the same difficulty

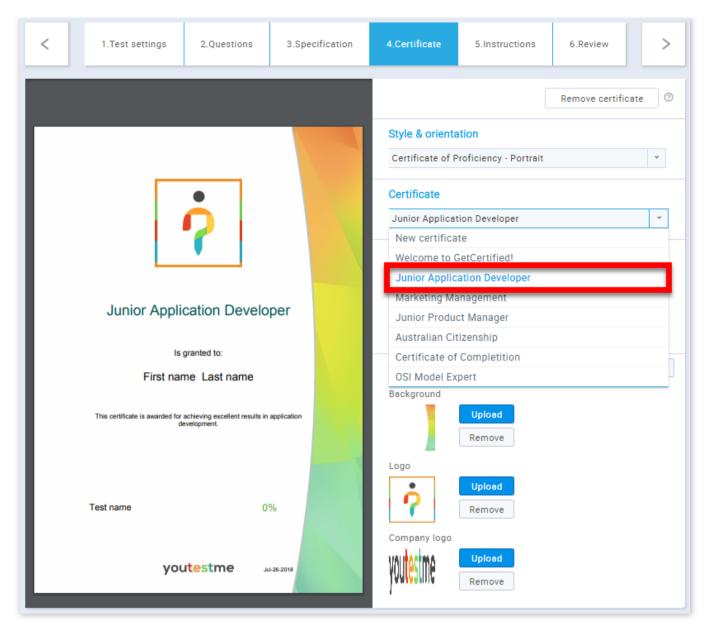

5. Certificate

The next step is **"Certificate"** where you can add a certificate for users who pass the test. By clicking the **"Continue** button you will be able to design your own custom branded certificate or add an already existing one to your test.

<	1.Test settings	2.Questions	3.Specification	4.Certificate	5.Instructions	6.Review	>
Optional	certificate						
			Add certifi	cate			
			akers who pass the tes		icate		
			By clicking continue yo sign your own custom				

sign your own custo	
Continue	Skip

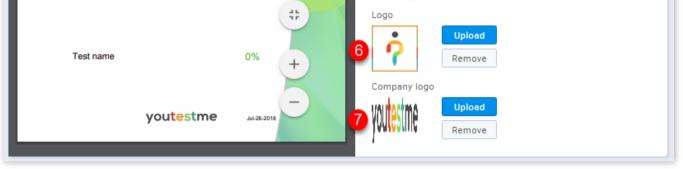

The certificate designer will open. That is a place where you can choose an existing certificate design in the "Certificate" dropdown list or you can create a new one.

5.1. Create a certificate

You can also create your own certificate.

< 1.Test se	ttings 2.Questions	3.Specification	4.Certificate	5.Instructions	6.Review	>

1. Click the **"Save test template"** button and choose the **"Create new"** option

2. You should write the name of your template

3. You should write the description of your test template, this is not obligatory

4. You can choose the privacy ("Public" - the test template is available to all users with the adequate permissions, "Private" - the test template is available only to the user who has created it)

5. Click the **"Save"** button

6. If you are not satisfied with the test template you have made click the "Cancel" button

If you need help with scheduling the test and assigning it to the users see Manage tests.

New test

Page 56

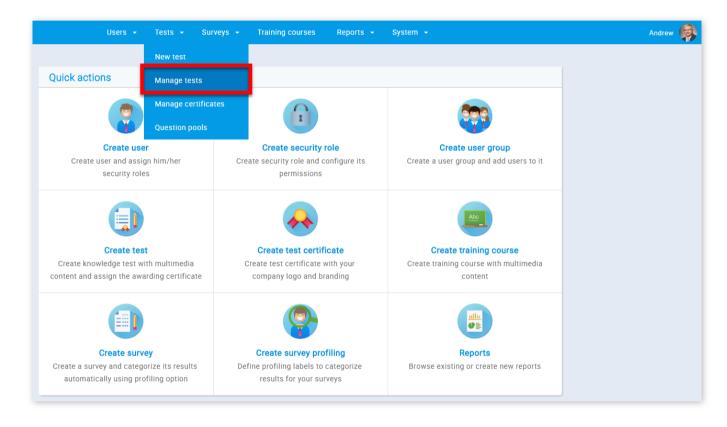

Help system

Manage tests

This page is the landing page after the test creation process and can also be accessed via the main menu. It allows you to work on the tests you have access to. You can view and edit basic test information, add test candidates and appoint test managers. Here, you can also examine test scores and work with test questions (add, delete or modify them). You can view basic test reports and export them as an Excel table.

1. Accessing the page

To access the "Manage tests" page, you should hover over the **"Tests"** section of the application's main menu and select the **"Manage tests"** option.

2. Page layout

On the left side of the **"Manage tests"** page, you will find the sidebar where you can see a list of tests organized as:

Search users	•			Users 👻	Tests 👻	Surveys 👻	Training courses	Reports 👻	System 👻

est templates (3) 🛛 7										

1. "All tests" – list of all tests in the system

2. "Not scheduled" – tests that are created, but are waiting to be scheduled and sent to the users

- 3. "**Running**" currently available tests
- 4. "Scheduled" tests that are scheduled, but are not available yet
- 5. "Expired" availability period ended, currently not available for taking
- 6. "Suspended" test taking and modifications permanently disabled
- 7. "**Test templates**" store test settings, can be reused in creating new tests

8. You can also create a new test by clicking the **"Create"** button. If you need help with creating new test see the New test help section

3. To select one of the tests, you should navigate to the tree view on the left side of the screen and expand one of the available test collections. You can select the one you would like to work with by clicking on it.

- 1. The certificate which will be awarded to users that pass the test. You can select any of the certificates you manage
- 2. The test name, which you can change
- 3. The description of the test. You can edit this
- 4. The instructions for the test takers. You can edit this

5. Here you can see if the test is included in any of the training courses

6. The test status ("Expired", "Running", "Not scheduled", "Scheduled", "Suspended")

7. The time from which the test is available for taking

8. The time to which the test is available for taking

9. The name of a user who created the test and the time when the test was created

10. The name of a user who updated the test and the time when the test was updated

4.2. Test settings

Test settings									
Creation type:	Manually created		2	Test versions:	1				
3 Show report:	Immediately after	finishing	4	Report contents:	Grade and preview				
5 Duration type:	Unlimited								
6 Network access:	Open access		Branching questions: No						
8 Allow continua	tion ⊘		9	 Allow repeating 	0				
10 Pass mark (%):	50		11	✓ Inclusive pass n	nark 💿				
Validity									
12 Enable validity	period								
Test sharing optic	ons								
13 Pin this test to	Pin this test to home screen ③ The test is not pinned to the home screen. Only directly assigned users can take it.								
14 Allow HTML lin	k sharing ⊘	The test is not publicly share	red.						

1. The creation type ("Manually or "Generated")

2. The number of test versions (of a "Generated" test)

3. The type of show report ("After each question", "On manager's approval", "Immediately after finishing")

- 4. The type of report content ("Grade and preview", "Grade only"), this can be changed
- 5. The duration type ("Time per test", "Time per question", "Unlimited")
- 6. The network access ("Open access", "Internal network"), this can be changed
- 7. Displays if the test allows branching
- 8. Displays if the test allows continuation, this can be changed
- 9. Displays if the test allows repeating, this can be changed
- 10. Displays the pass mark (%), this can be changed
- 11. Displays if the pass mark is inclusive, this can be changed

12. Here you can enable validity period. Represent the validity duration of each attempted test after which the test becomes invalid and it is necessary to be retaken

- 13. Here you can pin the test so that all users can start it from the home screen
- 14. Here you can allow HTML link sharing so that the test can be entered by it

5. Manage candidates

To add test candidates or appoint additional test managers, you should navigate to the **"Manage candidates"** tab. Here, you can display the "List of test managers", "List of test takers", "List of all users" and "Groups you manage" and select the appropriate users. If the test has not yet been scheduled you can do this by selecting the **"Go manage"** button.

3	Which official symbol of Australia property?	identifies Commonwealth		3/0	Hard	Single choice	Q

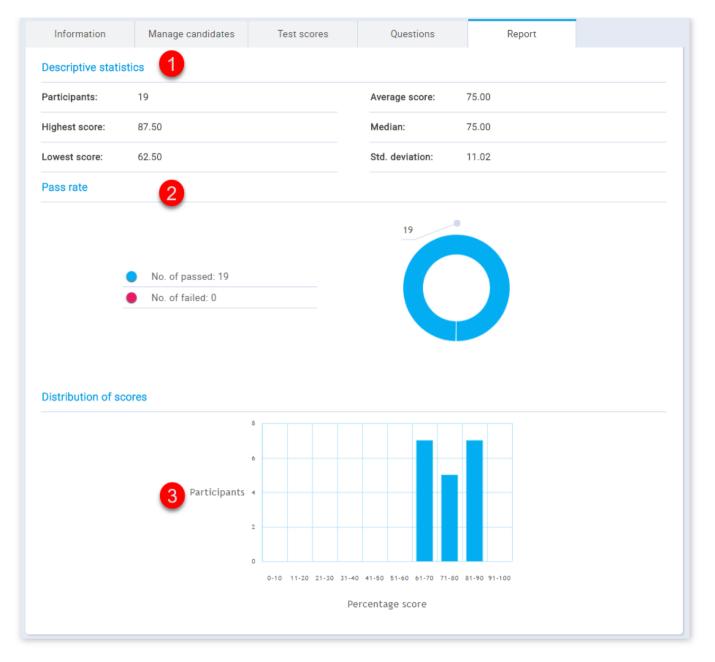

9. Report

The purpose of this section is to summarize and display basic information related to successfully completed test attempts. It is divided into three sub-sections:

1. Descriptive statistics - the number of participants, highest score, lowest score and central tendencies measures

2. Pass rate - graphical representation of the ratio between the number of test takers that passed the tests and that failed the test

3. Distribution of scores - graphical representation of test scores, suitable for comparing with the bell curve

10. Advanced options

10.1. Exporting Test

GetCertified allows you to export the test to a PDF file, ready for immediate printing. By clicking the **"Option"** drop-down button and choosing the "Export test" option, all of the test versions will be exported.

Info	ormation	Manage candid	ates	Test scores	Qu	lestions	Report		Preview Delete

Note: Modifications available after the test has been distributed to the test candidates are related to the test name, report contents and the pass mark. It is also possible to add more participants and change the test's availability (if it hasn't expired already).

10.3. Copy/Delete Test

It is possible to create a copy of an existing test or to delete it. To create a copy of an existing test, choose the desired test within the **"Manage tests"** page. Once you have selected it, click on the **"Options"** drop-down and then select the **"Create a copy"** option.

Note: When the test is copied, he has none of the test candidates assigned to it, since the test candidates are not copied from the original test.

10.4. Test Repetition

If you want to allow users to retake the test navigate to that test within the **"Manage tests"** page, open the **"Manage candidates"** tab and select a specific user. In order to allow the selected user to take the test again, click on the **"Reset"** link.

Note: When you allow test repetition to the user(s), the system keeps the record of previous attempts.

Manage tests

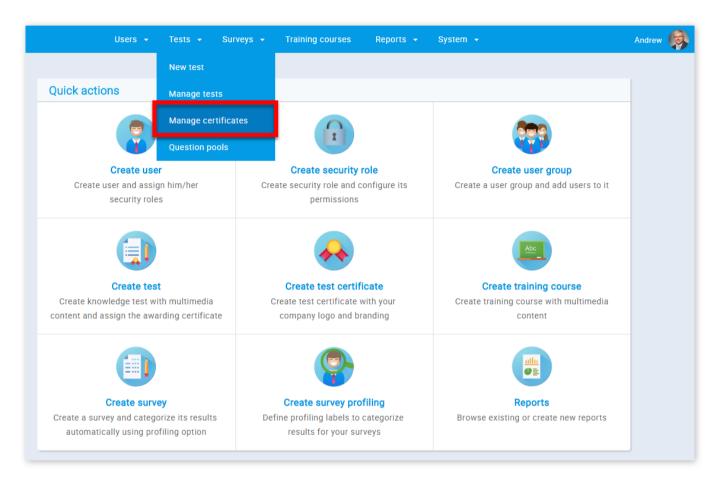

Page 70

Manage certificates

The test can have a Certificate that will be awarded to candidates who successfully complete the test. Certificate manager can designate other users as Certificate managers.

1. Accessing the page

To manage certificates, you should click on the **"Tests"** in the application's toolbar and then choose **"Manage certificates"**.

2. A list of all certificates is displayed in the navigation tree in the left part of the page. You can choose the certificate you want to manage by selecting it in the navigation tree. When you select a certificate, its name is displayed, as well as the **"Information"** tab.

Question pools

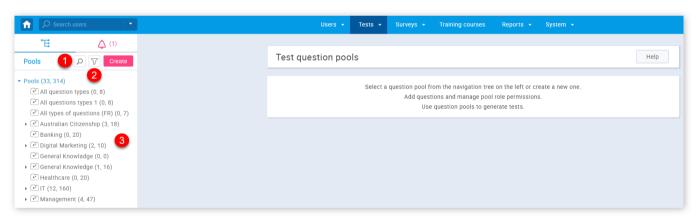

Questions are organized in question pools also known as question banks. Pool access is restricted only to pool members.

1. Accessing the page

To access the "Question pools" page you should go to "Tests" in the application's toolbar and choose "Question pools".

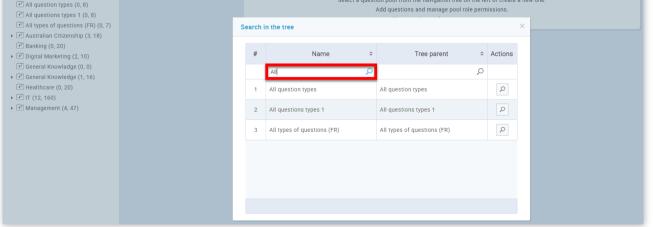

2. On this page, you can use the sidebar on the left to search, edit or create new question pools.

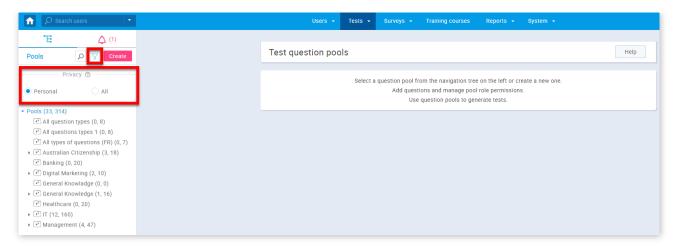

1. To search for a pool, you must click on the button with a magnifying glass image and then enter the name of the pool in the pop-up window.

A Search users ▼	Users 👻	Tests 👻	Surveys 👻	Training courses	Reports 👻	System 👻	
TE (1)							
Pools	Test question poo	ls					Help
✓ Pools (33, 314)		Select a	question pool fr	om the navigation tree	on the left or cr	eate a new one	

2. In order to filter pools that are displayed to you, you should click on the button with a funnel image and then choose the privacy of the pool you want to see.

3. To view information about a pool that exists or to edit it, you need to find the pool name in the pool tree. In the pool tree, you will find that some of the nodes have bullets on the left. This means that the pool has a sub-pool and you can see them by clicking on the bullet and in that way expanding the node. To select a pool, simply click on its name in the tree.

Question pools

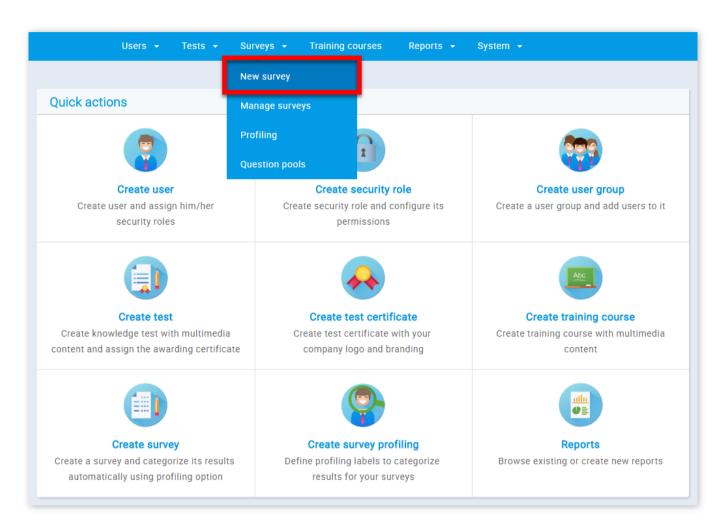

Page 80

New survey

In the "New survey" page you can create new surveys to be taken by users.

1. Accessing the page

To access the "New survey" page, you should click on "Surveys" in the application's toolbar and select "New survey".

2. Survey settings

The first step in the survey creation process is "Survey settings".

	Users 👻 Te	ests 👻 Surveys	Training cours	ses Repo	orts 👻 System 👻		
	1.Survey settings	2.Questions	3.Instructions	4.Review		>	
Survey information			Survey settings		9	Load He	elp
Name:*		3	Network access: ⑦		Open access	*	
Description:		4	Show report:		Immediately after fini	shing 👻	
·		5	Report contents:		Result and preview	-	
		6	Allow continuation	on @ 7	Randomize question Randomize answe		

1. This is the survey name.

2. This the survey's description.

3. Limit the survey access only to people within your local (internal) network by choosing "Internal network" or put an open access to allow access to people both inside and outside of your network by choosing "Open access".

	1.Survey settings	2.Questions	3.Instructions	4.Review			>
Survey information			Survey settings			Load	Help
Name:*			Network access: ⑦ Show report: Report contents: Allow continuation		pen access pen access nternal network Randomize questi Randomize answe		

4. Choose the way users will see the survey report. Reports can be shown "On manager's approval" or "Immediately after finishing".

	1.Survey settings	2.Questions	3.Instructions 4.Re	view		>
Survey information			Survey settings		Load	Help
Name:*			Network access: ⑦ Show report:	Open access Immediately after fi		▼ ▼
			Report contents:	Select one On manager's app Immediately after		

5. Choose if you want users to see both their result and answer preview by choosing "Result and preview", or only their result by choosing "Result only".

	1.Survey settings	2.Questions	3.Instructions	4.Review		>
Survey information			Survey settings		Lo	ad Help
Name:* Description:			Network access: ⑦ Show report: Report contents: Allow continuatio	Im S∉ 01	en access mediately after finishin elect one n manager's approval nmediately after finisl	П

6. Allow candidates to save selected answers, take a break and continue the survey later within the allowed time.

7. This option instructs the system to generate random questions from the question pool. For example, if you are creating a survey with 10 questions, by selecting **"Randomize questions"**, the system will randomize the order of those 10 questions in a way that each survey taker will get questions in a different order.

8. When this option is selected, the system will show randomized answer ordering on each question, in a way that for the same question each of the survey takers will get a different answer ordering.

9. You can upload a survey created in an Excel template by clicking on the **"Load"** button. Once the **"Upload survey"**

window is opened, click on browse, locate the prepared survey template and select the **"OK"** button. You can download the template from the **"Upload survey"** window by clicking on the link.

Upload survey ×
YouTestMe application has a feature that enables users to import surveys from .xlsx (Microsoft Excel) files in a quick and efficient manner. This way, users can create a survey with the help of a predefined template, import it using the application's interface and utilize it later. To properly upload files into the application it is necessary to fill in the template in the right manner. Detailed instructions that explain this procedure can be downloaded here.
Choose File No file chosen Confirm Cancel

3. Questions

The next step in the survey creation process is adding questions.

Number of questions: 0 # Question text Question text Actions No data	<	1.Survey settings	2.Questions	3.Instructions	4.Review	>
No data	Number of questions: 0	1	Add new question	2	Import questions fr	om pools
No data	#		Question text		\$	Actions
					Q	
10 V	No data					
14 <4 P> PI 10 V						
NA KA DE NI 10 V						
ia <a 10="" <b="" ⊨i="" ⊳⊳="">v						
ia <a ⇒=""> ≥i 10 v						
iet <et>>>> >= 10 v</et>						
re <e>> >r 10 v</e>						
			14 <4 >> >1	10 🔻		

1. One way of adding questions is adding them manually (creating new questions). When you click on the **"Add new question"** button an expandable form will appear.

Question text	Options
B I Ц x, x' 注 臣 吾 吾 〓 王 rT- Tg % ↔ " ?	
Question example.	
Answers	Weight @ Options

- 1. Here you can enter the question text.
- 2. This represents the answer's ordinal number in the question.
- 3. Here you can enter the answer text.

4. Here you can set the answer's weight which defines the impact that the answer has on the survey outcome.

5. In the **"Options"** section you can toggle between edit and preview a question/answer and you can add a picture to the question/answer. Removing is available only for answers.

6. Click on the **"Add answer"** button to add another answer to the form.

7. Choosing the **"Add to pool"** option will allow you to the question you are creating to an existing question pool.

Question text	Options
B $I \ \underline{U} \ \mathbf{x}_{*} \ \mathbf{x}^{*} \ \Xi \equiv \Xi \equiv \mathbf{T} \cdot \mathbf{r} \mathbf{T} \cdot \mathbf{T}_{\underline{s}} \ \mathfrak{B} \ \phi \ \mathfrak{O}$ Question example.	
Answers	Weight ⑦ Options
B I U x. x ² I I I I I 1 ▼ Answer 1	
B I U x, x* !:= E I I T- T	
	Add answer
Add to pool ⑦ Select one	Y
Add to survey Cancel	

8. Clicking on the "Add to survey" button will add the question to your survey.

9. Clicking on the **"Cancel"** button will close the expanding form and the question will not be added to your survey.

2. Another way of adding questions is by importing them from question pools. When you click on the **"Import questions from pools"** button an expandable form will appear.

6. Completing survey preparation

Before sending the survey, you need to assign a profiling to the survey and add survey participants, as well as determine the start and end dates of the survey. All of this is explained in the Manage surveys help section.

Manage surveys

1. Accessing the page

To access the "Manage surveys" page, you should hover over the **"Surveys"** section of the application's main menu and select the **"Manage surveys"** option.

2. Page layout

On the left side of the "Manage surveys" page, you will find the sidebar where you can see a list of surveys organized as:

Search users	1		Users 👻 Te	sts 👻	Surveys 👻	Training courses	Reports 👻	System 👻	
Έ (0)									
Surveys ⑦ Create	0	Surveys							Help
All surveys (6)					Select a si	urvey from the navig	ation bar on the le	ft.	
Not scheduled (2)						y questions and man results and export t			
Running (4)									
Scheduled (0)									
Expired (0) 5									
Suspended (0)									

- 1. "All surveys" list of all surveys in the system
- 2. "Not scheduled" surveys that are created, but are waiting to be scheduled and sent to the users
- 3. "Running" currently active surveys

4. "Scheduled" – surveys that are scheduled, but are not active yet

- 5. "Expired" surveys that are no longer active
- 6. "Suspended" canceled surveys

7. You can also create a new survey by selecting the **"Create"** button. If you need help with creating a new survey see New survey

3. In order to select one of the surveys, you should navigate to the tree view on the left side of the screen and expand one of the available survey collections. You can select the one you would like to work with by clicking on it.

- 1. The survey name, which you can change
- 2. The description of the survey. You can edit this

3. The instructions for the survey takers. You can edit this

4. The survey status ("Expired", "Running", "Not scheduled", "Scheduled", "Suspended")

5. The time from which the survey is available for taking

6. The time to which the survey is available for taking

7. The name of a user who created the survey and the time when the survey was created

8. The name of a user who updated the survey and the time when the survey was updated.

9. The type of show report ("On manager's approval", "Immediately after finishing")

10. The type of report content ("Result and preview", "Result only"), this can be changed

11. The network access ("Open access", "Internal network"), this can be changed

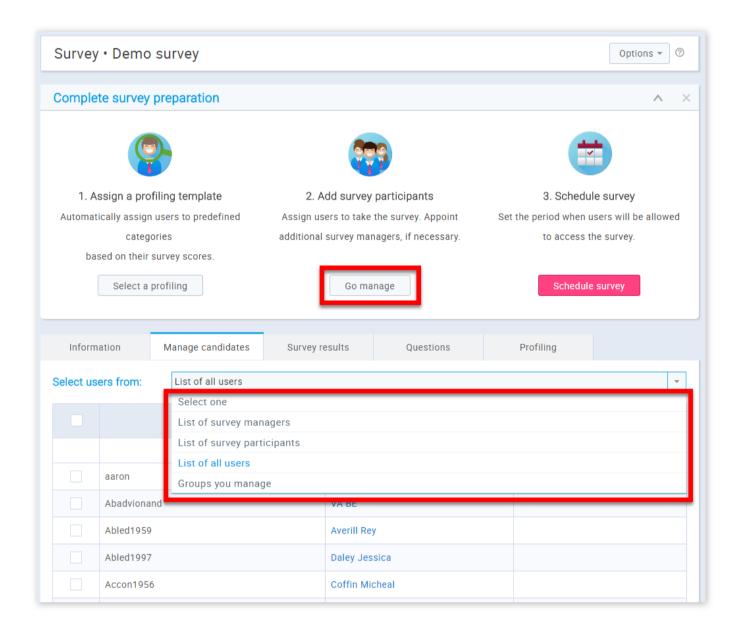

12. Displays if the survey allows continuation, this can be changed

13. Here you can pin the survey so that all users can start it from the home screen

14. Here you can allow HTML link sharing so that the survey can be entered by it

5. Manage candidates

In order to add survey participants or appoint additional survey managers, you should navigate to the **"Manage candidates"** tab. On this tab is a list of users. You can choose in the search bar to view "List of the survey managers", "List of survey participants", "List of all users" and "Groups you manage". If the survey has not yet been scheduled you can go to this tab by clicking the **"Go manage"** button too.

Manage surveys

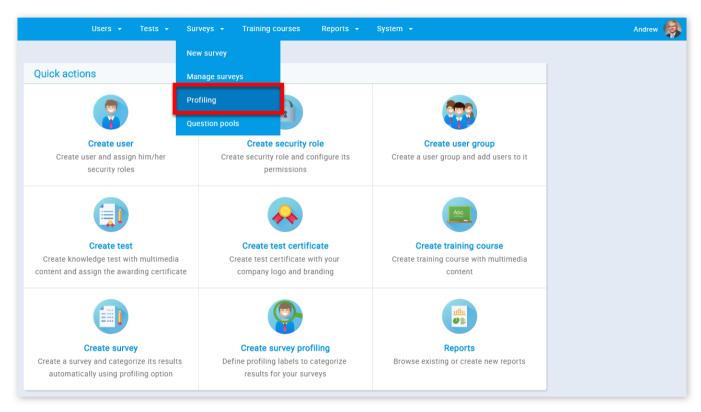

Page 99

Profiling

In this section, you can create and manage profiling that will be used for your surveys.

1. Accessing the page

To access the **"Profiling"** page, you should go to **"Survey"** on the appplication's toolbar and choose **"Profiling"**.

2. Profiling templates

A profiling template is a set of predefined categories(profiling labels) used to organize survey results. The **"Profiling templates"** tab gives you an overview of your profiling which you can edit or delete. In order to delete the profiling click the button with an image of a bin next to the profiling's description. You can also export the list as an Excel file by clicking the **"Export as Excel"** button.

Profiling templates New profiling

Survey question pools

Question pools can theoretically hold an infinite number of questions. Pool access is restricted only to pool users.

1. Accessing the page

To access the "Question pools" page, you should click on the "Surveys" menu and select "Question pools".

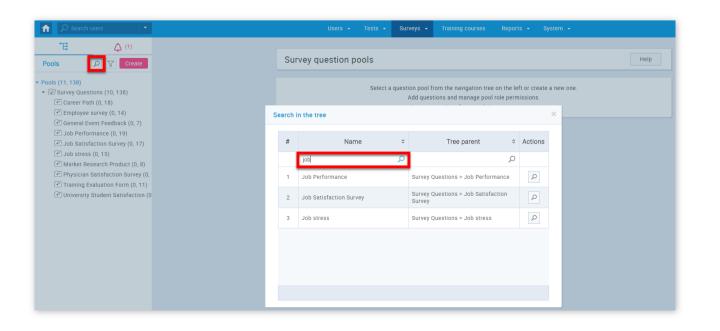

2. On this page, you can use the sidebar on the left to search, edit or create a new question pool.

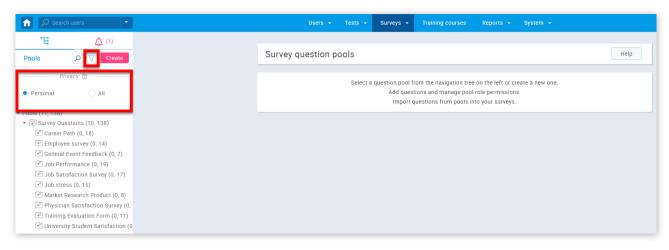

Search users	Users 👻	Tests 👻 S	urveys 👻	Training courses	Reports 👻	System 👻

 Market Research Product (0, 8) Physician Satisfaction Survey (0, 1) Training Evaluation Form (0, 11) 							
University Student Satisfaction (0							

1. To search for a pool, you should click on the button with a magnifying glass image and then enter the name of the pool in

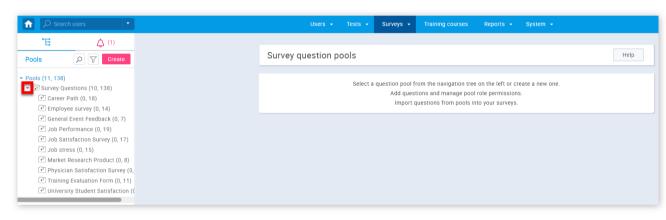

the pop-up window

2. In order to filter pools that are displayed to you, you should click on the button with a funnel image and then choose the privacy of the pool you want to see

3. To view information about a pool that exists or to edit it, you need to find the pool name in the pool tree. In the pool tree, you will find that some of the nodes have bullets on the left. This means that the pool has a sub-pool and you can see them by clicking on the bullet and in that way expanding the node. To select a pool, simply click on its name in the tree

3. Create a question pool

GetCertefied allows you to create your own question pools.

Help system

Training course

Training courses are organized in training steps (chapters). Each training course step can have a test and attachments (training course materials). The training course manager is a user who can change training course. By default, the training course creator is the training course manager. Managers can give managing privileges to other users.

1. Accessing the page

To access the **"Training courses"** select **"Training courses"** from the application's toolbar.

2. Page layout

A list of training courses is displayed in the navigation tree in the left part of the page.

Search users	Users + Tests + Surveys + Training courses Reports + System +	
۵) 🖒 🔁		
Training courses Create	Training courses	Help
Il training courses (3)	Create progressive training courses organized in steps that have to be passed.	
lanaged training courses (1)	Add different types of multimedia content to your training steps. Assign existing tests with certificates to your training steps as a check or final evaluation point.	
	Test scheduling has to be performed on test management page, but test candidates can be assigned implicitly th	rough training.

- 1. "All training courses" displays all training courses in the system
- 2. "Managed training courses" displays training courses that user is a manager of
- 3. Information

When you select a training course, its name and description are displayed, as well as the **"Information"** tab showing basic information about the training course.

Information	Candidates	Managers	Steps		
Name:	Demonstrates a training w	vith 4 steps, all attachme	nt types and 2 tests.	Training course ID: 1060	
Description:	Banking (Four Steps, All a	ttachment types, two test	ts)		

1. This is the name of a training course

2. This is the description of training courses

3. Here you can choose whether the training course is pinned. When you pin the training course all users in the system will be able to start it from the home screen

4. Candidates

A list of all candidates of the selected training course is shown on the **"Candidates"** tab, as well as their progress in the selected training course. To assign the course to candidates:

Report builder

The **"Report builder"** module provides customizable reports on different sections of the application, allowing for advanced customization by specifying the parameters by which you wish to filter your reports.

1. Accessing page

To access the "Report builder" page, you should click on the "Reports" menu and select "Report builder".

2. Choose reports

Upon opening the screen, you are prompted to select one of the following 7 reports :

		Choose report Choose parameters Report outcome						
		Reports						
		Finished tests statistics Reports for tracking statistics of finished tests in the system						
20		User success on tests Reports for tracking users' success on any test they took						
30		User outcome on surveys Reports for tracking statistics of users and their success on a survey (with an attached profiling)						
	?	General user statistics See statistics for each user in the system						
		Certificates Reports for tracking statistics of users and achieved certificates in the system						
	(?)	Question pools Reports for tracking information of question pools in the system						

- 1. "Finished test statistics"
- 2. "User success on tests"
- 3. "User outcome on surveys"
- 4. "General user statistics"
- 5. "Certificates"
- 6. "Question pools"
- 7. "Groups"

3. Choose parameters

3.1. Finished test statics

Finished test statistics provides reports for tracking statistics of finished tests in the system. You can customize the report by optionally entering the following parameters:

<		Choose report	Choose parameters	Report outcome	>
Finished test Reports for t	a s statistics racking statistics of finis	hed tests in the system	m		Help
Parameters					Sort order
1 Test name:	Contains	Exact			1. 🗪
2 Average points:	Less than	Greater than	Exact		2.
Advanced query spec	cification				
Sort direction:	Ascending	Descending			

- 1. "Test name" enter the desired test name by which you wish to filter the report
- 2. "Average points" enter the average points by which you wish to filter the report

3.2. Users success on tests

Users success on tests provides reports for tracking users' success on any test they took in the system. You can customize the report by optionally entering the following parameters:

<	Choose report Choose parameters Report outcome	>
User succe Reports for	ss on tests tracking users' success on any test they took	Help
Parameters		Sort order
Username:	O Contains	1. 🔪
First name:	O Contains	2. 🖊
Last name:	O Contains	3.
Test name:	O Contains 💿 Exact	4.
Success:	O Contains 💿 Exact	5. 🗪
Advanced query spo	ecification	
Sort direction:	Ascending Descending	

- 1. **"Username"** enter the username of the desired test taker
- 2. "First name" enter the first name of the desired test taker

3. "Last name" - enter the last name of the desired test take

4. "Test name" - enter the desired test name

5. "Success" - enter the success parameter of the desired test (can be 'Passed' or 'Failed')

3.3. User outcome on surveys

User outcome on surveys provides reports for tracking statistics of users and their success on a survey (with attached profiling). You can customize the report by optionally entering the following parameters:

<		Choose report	Choose parameters	Report outcome	>
	ne on surveys tracking statistics of user	s and their success or	n a survey (with an attached	l profiling)	Help
Parameters					Sort order
Username:	Contains	Exact			1.
2 First name:	Contains	Exact			2.
3 Last name:	Contains	Exact			3.
4 Survey name:	Contains	Exact			4.
Advanced query spe	cification				
Sort direction:	• Ascending	Descending			

- 1. "Username" enter the username of the desired survey taker
- 2. "First name" enter the first name of the desired survey taker
- 3. "Last name" enter the last name of the desired survey taker
- 4. "Survey name" enter the desired survey name

3.4. General user statistics

General user statistics provides statistics for each user in the system. You can customize the report by optionally entering the following parameters:

<	Choose rep	ort Choose parameters	Report outcome	>
	er statistics ics for each user in the system			Help
Parameters				Sort order
Username:	Contains • Exact			1. 🖍
First name:	Contains • Exact			2. 🖍

Sort direction:	Ascending Descending			

- 1. "Username" enter the username of the desired user
- 2. "First name" enter the first name of the desired user
- 3. "Last name" enter the last name of the desired user
- 4. "Gender" select the desired gender from the drop-down menu
- 5. "Status" select the users' status from the drop-down menu

3.5. Certificates

Certificates provide reports for tracking statistics of users and achieved certificates in the system. You can customize the report by optionally entering the following parameters:

<		Choose report	Choose parameters	Report outcome	>
Certificates Reports for tra	acking statistics of users	s and achieved certific	cates in the system		Help
Parameters					Sort order
Username:	Contains	Exact			1. 🧪
First name:	Contains	Exact			2. 🔪
Last name:	O Contains	Exact			3.
Certificate name:	Contains	Exact			4. 🗪
Test name:	Contains	Exact			5. 🖍
Advanced query speci	fication				
Sort direction:	Ascending	Descending			

- 1. "Username" enter the username of the desired user that has achieved the certificate
- 2. "Firs name" enter the first name of the desired user that has achieved the certificate
- 3. "Last name" enter the last name of the desired user that has achieved the certificate
- 4. "Certificate name" enter the desired certificate name
- 5. "Test name" enter the name of the test that has the desired certificate

3.6. Question pools

Question pools provide reports for tracking information of question pools in the system. You can customize the report by optionally entering the following parameters:

<		Choose report	Choose parameters	Report outcome	;
Question pools Reports for trac	king information of qu	estion pools in the sy	stem		Help
Parameters					Sort order
Question difficulty:	Select one				× 1. 🌶
Question type:	Select one				✓ 2.
Pool name:					3. 🧨
	🔵 Contains 🛛 🧕	Exact			
Advanced query specifi	cation				
Sort direction:	Ascending	Descending			

- 1. "Question difficulty" select the desired question difficulty from the drop-down menu
- 2. "Question type" select the desired question type from the drop-down menu
- 3. "Pool name" enter the desired question pool

Groups provide reports for tracking users in groups within the system. You can customize the report by optionally entering the following parameters:

<		Choose report	Choose parameters	Report outcome	>
Groups Reports for t	tracking users in groups w	vithin the system			Help
Parameters					Sort order
Username:	Contains	Exact			1. 🖍
2 First name:	Contains	Exact			2. 🖍
3 Last name:	Contains	Exact			3.
4 Group name:	Contains	Exact			4.
Advanced query spe	cification				
Sort direction:	• Ascending	Descending			

- 1. "Username" enter the username of the desired user that is assigned to the desired group
- 2. "First name" enter the first name of the user that is assigned to the desired group
- 3. "Last name" enter the last name of the user that is assigned to the desired group
- 4. "Group name" enter the desired group name

4. Generating the desired report

Upon finalizing the selection of the desired report and entering the optional parameters, you can generate the desired report in the following way:

<		Choose report	Choose parameters	Report outcome	1 >
Finished tests a Reports for trad	statistics cking statistics of finis	hed tests in the syster	n		Help
Parameters					Sort order
Test name:					1. 🖍
	O Contains	Exact			
Average points:					2. 🖍
	O Less than	Greater than 🛛 💿	Exact		
Advanced query specifi	ication				
Sort direction:	• Ascending	Descending			

inished tests statistics			
Test name	Average points	Average percent	Maximum points
1 Demonstrates a test with 8 types of timed questions and on managers approval reporting	6	75	8
2 Demonstrates a test with 8 types of timed questions with multimedia and certificate	5.79	72.37	8
3 Demonstrates a test generated by test generator with the enabled continuation and timed questions	8.65	86.5	10
4 Demonstrates a manually created test with multimedia and unlimited time with allowed repeating	25.53	85.09	30
	1-4 <4 1	⊳ ⊳i 100 ▼	Rows: 15

1. Click the right arrow in the upper right part of the screen

2. Export the desired report by clicking the **"Export to Excel"** button

Note: For advanced querying, you can use the **"Sort order"** and **"Sort direction"**.

<		Choose report	Choose parameters	Report outcome	
Finished tes Reports for	ts statistics tracking statistics of finis	hed tests in the syste	m		Help
Parameters					1 Sort order
Test name:	Contains	Exact			1. 🖍
Average points:	Less than	Greater than	Exact		2.
Advanced query spe	cification				_
Sort direction:	Ascending	Descending 2			

1. **"Sort order"** designates the order of the parameters by which your reports will be sorted. The numbers are assigned by default and you can change them by clicking on the pencil icon

2. "Sord direction" allows choosing between "Ascending" and "Descending" order

Report builder

Standard reports

YouTestMe GetCertified offers various standard reports in order to aggregate and organize information stored in the database. All of the reports are displayed in a tabular format (some of them with additional graphical representations) and can be exported as an Excel file.

1. Accessing the page

In order to access the **"Standard reports"** page, you should hover over the **"Reports"** section of the main menu and select the **"Standard reports"** option. This will lead you the navigation page, with nine report categories that contain multiple reports and are related to a specific application module.

tandard reports cate	gories			Report builder	
				Standard reports	
User reports (2	23)	Test reports (11)	Survey reports (5)
Administrators:	б	Running tests:	13	Running surveys:	4
Instructors:	2	Scheduled tests:	0	Scheduled surveys:	0
Students:	546	Expired tests:	3	Expired surveys:	0

Active groups: Inactive groups:	4 11 orts (2)	No. of test pools:	33 ts (7)	No. of survey pools:	(1)		

- 1. By clicking on the report category icon or name, you can open the list of all related reports
- 2. Displays the number of reports related to a specific category in the round brackets next to the report category name
- 3. Displays basic aggregated information related to the application module tied to a specific report category

3. Accessing reports

By clicking on one of the report categories, you will be navigated to a list of all reports related to that category, with their names and descriptions. In order to open the desired report, you should simply click on its name.

	Running tests	Sch	eduled tests	Expired	tests	Suspend	led tests	Not sche	duled te
	13		0		3		0		
#	Reports	name			De	escription			
1	Test size		Total numb	per of questions for ea	ach test in th	ne system			
2	Test questions by	Test questions by difficulty		easy, medium and ha	rd questions	s in each test			
3	Test results	Test results		The final outcome for each user who attempted taking any test within the system					
4	Tests basic info		List of all t	List of all tests with their descriptions and creation details					
5	Item reliability		Central tendencies measures for each attempted test and item reliability on ques		y on question le	vel			
6	Achieved certifica	tes	Every succ	essfully finished certi	fication atte	mpt with date	and basic de	tails	
7	Test pass rate		The ratio b	etween attempted and	d passed tes	sts			
8	Average test durat	ion	List of ave	rage duration for each	attempted	test with limite	d duration		
9	Test questions by	type	Number of	Number of questions for each test broken down by question type					
10	Tests status and a	vailability	List of all t	ests in system with so	ome basic in	formations			

4. Actions

All of the reports have a tabular structure and allow the same actions:

#	User	≎ Test name ≎	Test started ≎	Score (%)≎	Outcome 🗧
2	م ب	Q	Q	Q	, C
71	James Nunn	1 Demonstrates a test with 8 types of timed questions and on managers approval reporting	May-16-2018 10:47 AM	87.50	Passed
72	Maxwell Timmons	3 Demonstrates a test generated by test generator with the enabled continuation and timed questions	May-16-2018 10:46 AM	70.00	Passed
73	Maxwell Timmons	4 Demonstrates a manually created test with multimedia and unlimited time with allowed repeating	May-16-2018 10:47 AM	100.00	Passed
74	Maxwell Timmons	2 Demonstrates a test with 8 types of timed questions with multimedia and certificate	May-16-2018 10:47 AM	75.00	Passed
75	Maxwell Timmons	1 Demonstrates a test with 8 types of timed questions and on managers approval reporting	May-16-2018 10:47 AM	87.50	Passed
76	Ana Cannon	5 Demonstrates a timed test with after every question reporting and certificate	May-16-2018 10:46 AM	100.00	Passed

- 2. Filtering the results
- 3. Exporting the results as an Excel table

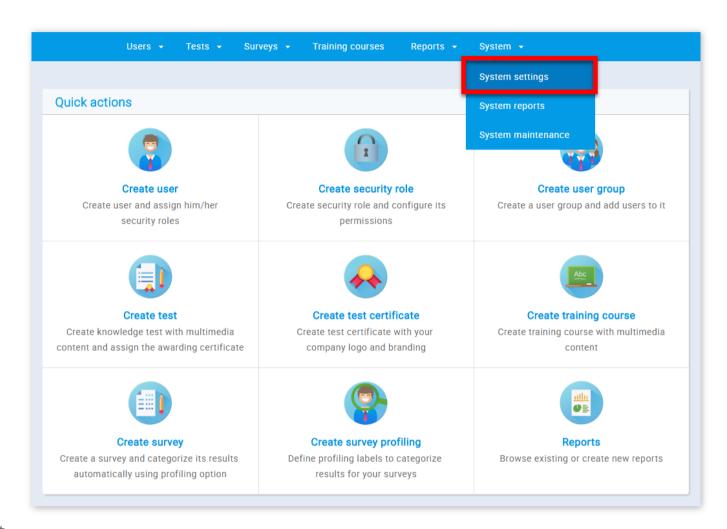

Standard reports

System settings

Mail server(s), the internal network, custom emails and system information are located in the "System settings" page.

1. Accessing the page

To access the "System settings" page, you should click on the "System" menu and select "System settings".

2. Page layout

On the "System settings" page you will find four tabs: "Mail server", "Internal network", "Custom emails", and "System information".

ystem setti ersion: 6.0.3r	ngs (2) (3) (4)	Options • ?
Mail server	Internal network Custom Emails System information	
Mail server:	smtp.gmail.com (Active)	✓ Add new
lost:	smtp.gmail.com	
Port:	587	
SMTP Auth.:	Start TLS:	
Jsername:	ytm.system@gmail.com	
Password:		
system email:	ytm.system@gmail.com	
upport email:	ytm.system@gmail.com	

	Update existing Create new	
Mail server is activate	ted.	
Send test email to:	Type email address Send	

1. Mail server

The **"Mail server"** tab serves to set parameters for a mail server that will be used for sending various notifications to administrators and users over an email. There is no limit regarding the number of mail servers which can be set, so you can have an unlimited number of backup mail servers.

System setting Version: 6.0.3r	gs	Options -
Mail server	Internal network Custom Emails System information	
2 Mail server:	smtp.gmail.com (Active)	- Add new
3 Host:	smtp.gmail.com	
4 Port:	587	
5 SMTP Auth.:	Start TLS:	
6 Username:	ytm.system@gmail.com	
7 Password:

Password:					
System email:	ytm.systemasdasda@gma	ail.com			
Support email:	ytm.systemasdasd@gmai	l.com			
	Up	date existing C	reate new Delet	e	

Also, only inactive mail servers can be deleted, by clicking on the **"Delete"** button in the form of the inactive mail server.

System adr Version: 5.3	ninistration 3.0s
Mail server	Internal network SFTP transfer OS information System information
	r IP addresses (example: 192.168.*, 257.142.1*) that you wish to represent the internal network. Only the devices that are vork will be able to access the closed-type tests.
IP mask:	192.168.1.
Client's IP:	192.168.1.132
	3 Confirm Cancel 4

- 3. This is the host name of the mail server.
- 4. This is the port number of the mail server.
- 5. These are security parameters.
- 6. This is the username of the mail server.
- 7. This is the password for the mail server.
- 8. This is the system email of the mail server.
- 9. This is the support email of the mail server. **IMPORTANT:** Make sure that your support email is:

ytm.system@gmail.com if you want to contact the GetCertefied support team.

10. By clicking the **"Update existing"** button the entered parameters will be applied to the selected mail server.

11. By clicking on the **"Create new button"** button you will create a new mail server with the entered parameters.

12. You can test if the mail server works by sending an email to the address you specify in the **"Send test email to"** field by clicking the **"Send"** button.

2. Internal network

The **"Internal network"** tab allows you to define the IP addresses within your local network from which certain parts of the application can be accessed.

Mail server	Internal network	SFTP transfer	OS information	System information	
Set the masks fo	or IP addresses (example: 192		you wish to represent the i	nternal network. Only the o	devices that are in
this internal netv	vork will be able to access the	e closed-type tests.			
IP mask:	192.168.1.				
	192.168.1.132				
Client's IP:	192.100.1.132				

1. This is the IP mask of the internal network, only machines with IP addresses starting with this prefix will be allowed access.

- 2. This is the client's IP address.
- 3. Clicking the **"Confirm"** button will save the changes you have made.
- 4. Clicking the **"Cancel"** button will invalidate all the changes you have made.

3. Custom email

The **"Custom email"** tab contains email templates that are sent automatically when a certain action is made inside the application. The emails are predefined but can be edited by changing email templates. When editing templates, the variables (text places between \$ signs) cannot be edited.

Template: Account activated Select one Template preview Account activated Account activated B I I aber T Changed status Changed status Class assigned User removed from a class Account activated removed from a class	Mail server	Internal network	Custom Emails	SFTP transfer	OS information	System informatio

Save						

First, you must choose the email template that you want to change.

Mail server	Internal network	Custom Emails	SFTP transfer	OS information	System information
Template:	Account activated	· 2	List of all variables:	[from, pass, to, uname]	
Template previe	ew: 💿 🚺				

1. This is the body of the email. Text can be edited, but all the variables must be kept because the system uses it to fill in with data.

2. This is the list of all variables of a selected email template.

Mail server	Internal network	Custom Emails	SFTP transfer	OS information	System information
Template:	Account activated	.	List of all variables:	[from, pass, to, uname]	
Template preview	: ⑦	2	List of missing variab	oles: [from]	
$B {\cal I} \underline{U} abs T_{\tau}$	rT• H1• Ta 🍢 🗄 🗄 🗮 🗮	≡ ≡ ø @			
Your account has be Your credentials are Username: \$uname Password: \$pass\$ Best Regards,		1	8		

1. To save the modified e-mail template, click on the **"Save"** button. If some of the variables are missing, you will be prompted with an error message.

- 2. If you accidentally deleted any of the variables, you can see which one it is in the list of missing variables.
- 3. Clicking the **"Reset"** button changes body of the email to the predefined template.

4. SFTP transfer

On the **SFTP Transfer** tab, you can activate sending of reports regarding test completion, stored in a CSV format. If activated, reports will be sent at regular intervals and will contain information that refers to all new successfully completed test attempts (an empty CSV file will be sent if none of the test attempts was completed successfully in a defined interval).

Mail server	Internal network	SFTP transfer	OS information	System information	
Set the parameters fo	or sending new successfu	lly completed test attem	npts using SFTP.		nsfer: Active
2 IP address:	ftp.youtestme.com		3 Port:	21	
4 Username:	username		5 Password:		
6 Interval in minutes:	60	* *	7 Last sent:	Aug-3-2018 3:24 PM	
		Transfer is cur	Cancel 9		

- 1. Here you can adjust if the transfer is **"Active"** or **"Inactive"**
- 2. Here you should write the IP address
- 3. Here you should insert the port
- 4. Here you should write the username
- 5. Here you should write the password
- 6. Here you should insert the time interval(in minutes)
- 7. Displayed here is the time when the last report was sent
- 8. Click the "Confirm" button

9. If you are not satisfied with the changes you have made click the "Cancel" button

Note: insert the parameters of your FTP server.

5. OS information

On the **"OS Information"** tab you can get information about your operating system, by clicking the **"Display operating** system information" button.

Mail server	Internal network	SFTP transfer	OS information	System information

System settings

System reports

"System reports" offer insight into the system performance.

1. Accessing the page

To access the "System reports" page, you should click on the "System" menu and select "System reports".

2. Page layout

On the **"System reports"** page you can see system reports by completing three simple steps.

0	Choose report	Choose parameters	Report outcome	3	>
		2			
		Reports			
CPU Usage Per User					
Current Session Info					
Database Files					
DB Implementation Info					
Database Size					
Dead Locks					
Instance Info					
					Rows: 24

1. The first step is to choose the report you want to see. When you click on the desired report, you will be taken to the next

step.

2. The second step is to enter the parameters for your report. If you don't put any parameters you will receive all the records from the database for that report. To proceed, click on the arrow in the top right corner. To go back to the previous step, click on the arrow in the top left corner.

arameters			
File ID:			
File Name:

System reports

System maintenance

On this page, you can find the support for the "System maintenance" of GetCertified.

1. Accessing the page

To access the "System maintenance" page, you should click on the "System" menu and select "System maintenance"

2. Upgrade

Browse the upgrade package and click the **"Upload patch**" button. Upload patch file as the archive, do not extract it. The upgrade will not work if the file format is different from '.zip'. **IMPORTANT:** We strongly suggest that you perform a snapshot and export of YouTestMe Virtual Machine before applying any changes and verify that the virtual machine can be restored from the created export file.
